

SYSTEM OF RECORD SPECIFICATION

Section 1 – System of Record Governance Framework

1.1 Purpose

Establish the enterprise governance framework governing Systems of Record (SoR), authoritative data ownership, system accountability, synchronization controls, retention requirements, and traceability obligations across TODP.

1.2 Objectives

- Define authoritative data ownership.
- Eliminate data ambiguity.
- Support auditability.
- Improve governance oversight.
- Ensure enterprise data consistency.

1.3 Scope

Applies to:

- Core business entities
- Governance entities
- Operational entities
- Security entities
- Compliance entities
- Audit entities

1.4 Governance Principles

- Single Source of Truth
- Authoritative Ownership
- Controlled Synchronization
- Traceability by Design
- Auditability

1.5 TODP System Categories

Category A

Systems of Record

Category B

Systems of Engagement

Category C

Systems of Insight

Category D

Systems of Control

1.6 Core TODP Systems of Record

Opportunity Repository

Authority Repository

Evidence Repository

Governance Repository

Audit Repository

Identity Repository

Risk Repository

Compliance Repository

1.7 Governance Requirements

Every System of Record shall maintain:

- System owner
- Data owner
- Retention policy
- Recovery requirements
- Audit controls

1.8 Authoritative Data Rules

- One authoritative owner per entity.
- Data ownership must be documented.
- Downstream systems cannot overwrite authoritative records.
- Synchronization activities must be auditable.

1.9 Ownership

Primary Owner:

Head of Data Governance

Review Authority:

Data Governance Committee

Approval Authority:

Product Governance Board

1.10 Traceability

RTM References:

- SOR-001
- DG-001
- DATA-001

1.11 Section Summary

This section establishes the governance framework, ownership principles, and accountability requirements governing Systems of Record across TODP.

SYSTEM OF RECORD SPECIFICATION

Section 2 – Opportunity Domain System of Record

2.1 Purpose

Define the authoritative system responsible for Opportunity entity management.

2.2 Domain

Opportunity Domain

2.3 Primary System of Record

Opportunity Repository

2.4 Authoritative Entity

Opportunity

2.5 System Owner

Product Management

2.6 Data Owner

Product Operations Team

2.7 Responsibilities

- Opportunity creation
- Opportunity lifecycle management
- Opportunity classification
- Opportunity status management

11.16 Section Summary

This section defines authoritative ownership, governance controls, synchronization requirements, and audit obligations governing enterprise analytics and reporting repositories.

SYSTEM OF RECORD SPECIFICATION

Section 12 – Enterprise Data Synchronization & Integration Governance

12.1 Purpose

Define enterprise standards governing synchronization, integration, replication, event propagation, and authoritative data movement between TODP systems.

12.2 Objectives

- Preserve authoritative ownership.
- Prevent data conflicts.
- Improve traceability.
- Support auditability.
- Maintain data integrity.

12.3 Integration Principles

- System of Record First
- Controlled Replication
- Immutable Audit Trails
- Traceable Synchronization
- Governance Approval

12.4 Integration Patterns

Pattern A

API-Based Synchronization

Pattern B

Event-Driven Synchronization

Pattern C

Scheduled Replication

Pattern D

Reporting Data Extraction

12.5 Synchronization Rules

- Systems of Record remain authoritative.
- Consumer systems cannot overwrite source records.
- Replication events must be logged.
- Synchronization failures require alerting.

12.6 Data Movement Governance

All data transfers shall maintain:

- Source system
- Destination system
- Transfer timestamp
- Transfer status
- Correlation identifier

12.7 Conflict Resolution Rules

Priority Order:

1. System of Record
2. Governance Override
3. Approved Correction Workflow

12.8 Monitoring Requirements

Monitor:

- Synchronization success rate
- Replication failures
- Data integrity violations
- Latency thresholds

12.9 Integration Security Requirements

- Encrypted transmission
- Authentication controls
- Authorization controls
- Audit logging

12.10 Reporting Requirements

Monthly

Synchronization Health Review

Quarterly

Integration Governance Assessment

12.11 Metrics

- Synchronization Success Rate
- Replication Accuracy Rate
- Data Integrity Score

- Integration Availability

12.12 Audit Requirements

Maintain:

- Synchronization logs
- Integration inventories
- Failure reports
- Governance reviews

12.13 Ownership

Primary Owner:

Head of Data Governance

12.15 Section Summary

This section defines enterprise synchronization governance, integration standards, conflict resolution rules, monitoring requirements, and audit controls governing data movement across TODP systems.

SYSTEM OF RECORD SPECIFICATION

Section 13 – Enterprise Retention, Archival & Record Preservation Standards

13.1 Purpose

Define enterprise requirements governing data retention, archival management, legal preservation, historical record maintenance, and record disposition across TODP Systems of Record.

13.2 Objectives

- Preserve business records.
- Support audit readiness.
- Maintain regulatory compliance.
- Protect governance evidence.
- Enable historical traceability.

13.3 Scope

Applies to:

- Operational records
- Governance records
- Audit records
- Security records
- Compliance records
- Customer records

13.4 Retention Principles

- Preserve Authoritative Records
- Retain Audit Evidence
- Maintain Traceability
- Support Regulatory Obligations
- Enable Controlled Disposal

13.5 Record Categories

Category A

Operational Records

Retention:

7 Years Minimum

Category B

Governance Records

Retention:

Permanent

Category C

Audit Records

Retention:

7 Years Minimum

Category D

Security Records

Retention:

7 Years Minimum

Customer Records

Retention:

Contract Duration + 7 Years

Category F

Reference Data

Retention:

Permanent

13.6 Archival Requirements

Archived records shall maintain:

- Original identifiers
- Ownership references
- Classification metadata
- Integrity validation records

13.7 Legal Hold Requirements

Records subject to:

- Investigation
- Litigation
- Regulatory review
- Governance review

shall be protected from disposal until release authorization is granted.

13.8 Disposal Governance

Disposal requires:

- Retention validation
- Ownership approval
- Compliance approval
- Audit recording

13.9 Recovery Requirements

Archived records shall remain recoverable within approved recovery objectives.

13.10 Monitoring Requirements

Monitor:

- Retention compliance

- Archival success
- Legal hold compliance
- Disposal activities

13.11 Metrics

- Retention Compliance Rate
- Archival Success Rate
- Recovery Success Rate
- Disposal Validation Rate

13.12 Audit Requirements

Maintain:

- Retention inventories
- Archival reports
- Disposal approvals
- Legal hold records

13.15 Section Summary

This section defines enterprise retention requirements, archival controls, legal hold standards, disposal governance procedures, and preservation obligations governing TODP authoritative records.

SYSTEM OF RECORD SPECIFICATION

Section 14 – Enterprise System of Record Control Framework

14.1 Purpose

Define the enterprise control framework governing Systems of Record, ownership accountability, operational integrity, change management, and authoritative data protection.

14.2 Objectives

- Protect authoritative records.
- Strengthen governance oversight.
- Improve accountability.
- Maintain data integrity.
- Support enterprise auditability.

14.3 Control Domains

Domain A

Ownership Controls

Domain B

Access Controls

Domain C

Change Controls

Domain D

Synchronization Controls

Domain E

Audit Controls

Domain F

Recovery Controls

14.4 Ownership Control Requirements

Every System of Record shall maintain:

- System owner
- Data owner
- Steward assignment
- Governance accountability

14.5 Access Control Requirements

- Role-based access control
- Least privilege access
- Periodic access reviews
- Segregation of duties

14.6 Change Control Requirements

Changes to authoritative records require:

- Approved workflow
- Audit trail generation
- Version tracking
- Governance review

14.7 Integrity Control Requirements

Controls shall validate:

- Record completeness
- Record consistency
- Referential integrity
- Synchronization accuracy

14.8 Monitoring Control Requirements

Monitor:

- Unauthorized modifications
- Synchronization failures
- Access anomalies
- Control failures

14.9 Recovery Control Requirements

All Systems of Record shall maintain:

- Backup capability
- Recovery procedures
- Recovery testing
- Disaster recovery integration

14.10 Governance Reviews

Monthly

System of Record Review

Quarterly

Control Effectiveness Assessment

Annually

Enterprise SoR Governance Assessment

14.11 Metrics

- Control Compliance Rate
- Integrity Validation Rate
- Recovery Success Rate
- Access Review Completion Rate

14.12 Audit Requirements

14.15 Section Summary

This section defines the enterprise control framework, ownership requirements, integrity controls, monitoring standards, and governance mechanisms protecting TODP Systems of Record.

SYSTEM OF RECORD SPECIFICATION

Section 15 – Enterprise System of Record Governance, Assurance & Continuous Improvement

15.1 Purpose

Establish the governance model governing System of Record oversight, assurance activities, maturity assessments, performance measurement, and continuous improvement across TODP.

15.2 Objectives

- Maintain authoritative data integrity.
- Improve governance effectiveness.
- Strengthen enterprise assurance.
- Support scalability.
- Enable continuous optimization.

15.3 Scope

Applies to:

- All Systems of Record
- All data owners
- All governance owners
- All repositories
- All integrations

15.4 Governance Principles

- Authoritative Ownership
- Transparency
- Traceability
- Accountability
- Continuous Improvement

15.5 Governance Structure

Product Governance Board

Data Governance Committee

Architecture Review Board

Compliance & Governance Committee

Enterprise Data Owners

15.6 Governance Lifecycle

Assess

→ Review

→ Improve

→ Validate

→ Monitor

→ Reassess

15.7 Assurance Activities
