

AI GOVERNANCE FRAMEWORK

Section 1 – AI Governance Framework Overview

1.1 Purpose

Establish the enterprise governance framework governing AI-assisted processing, retrieval operations, ranking activities, recommendation generation, explainability controls, oversight mechanisms, and decision assurance across TODP.

1.2 Objectives

- Ensure responsible AI operation.
- Maintain explainability.
- Enable traceability.
- Support human oversight.
- Reduce AI-related risk.
- Support enterprise trust and auditability.

1.3 Scope

Applies to:

- Retrieval Module
- Ranking Module
- Recommendation Module
- Governance Module
- Audit Module

- Replay Module

1.4 TODP AI Governance Principles

- Transparency
- Explainability
- Traceability
- Auditability
- Replayability
- Human Accountability
- Governance by Design

1.5 Governance Vision

Enable trustworthy, explainable, evidence-backed decision support while maintaining enterprise-grade governance, auditability, and operational accountability.

1.6 Governance Objectives

The framework shall ensure:

- Explainable recommendations
- Traceable evidence chains
- Governance review capability
- Replay validation capability
- Risk-aware AI operation

1.7 TODP Decision Flow

Opportunity

→ Authority

→ Evidence

→ Retrieval

→ Ranking

→ Recommendation

→ Governance Review

→ Audit

→ Replay

1.8 Governance Domains

Domain A

AI Strategy Governance

Domain B

AI Operational Governance

Domain C

Recommendation Governance

Domain D

Risk Governance

Domain E

Compliance Governance

Domain F

Audit & Replay Governance

1.9 Governance Lifecycle

Planning

→ Design

→ Validation

→ Deployment

→ Monitoring

→ Governance Review

→ Improvement

1.10 Governance Alignment

This framework aligns with:

- PRD V1
- BRD V1
- SRS V1
- SAD V1
- RTM V1
- SECURITY ARCHITECTURE V1
- DATA GOVERNANCE V1
- PRODUCT GOVERNANCE MODEL

1.11 Governance Outcomes

- Trustworthy recommendations
- Explainable outputs
- Auditable decision paths
- Controlled AI operations

1.12 Metrics

- Governance Compliance Rate
- Explainability Coverage
- Replay Success Rate
- Governance Review Completion Rate

1.13 Audit Requirements

Maintain:

- Governance Records
- Review Reports
- Risk Assessments
- Validation Evidence

1.14 Ownership

Primary Owner:

AI Governance Lead

Review Authority:

AI Governance Committee

Approval Authority:

Product Governance Board

1.15 Traceability

RTM References:

- AIGOV-001
- AIGOV-002
- GOV-001

1.16 Section Summary

This section establishes the foundational governance framework, principles, objectives, oversight structures, and accountability model governing AI activities within TODP.

AI GOVERNANCE FRAMEWORK

Section 2 – AI Governance Organization & Oversight Structure

2.1 Purpose

Define governance organizations, oversight responsibilities, escalation authorities, and decision rights supporting TODP AI governance.

2.2 Objectives

- Clarify accountability.
- Establish governance oversight.
- Improve decision transparency.
- Reduce governance ambiguity.
- Enable scalable governance operations.

2.3 Governance Principles

- Accountability
- Segregation of Duties
- Independent Oversight
- Traceable Decisions

2.4 Governance Bodies

AI Governance Committee

Product Governance Board

Compliance & Governance Committee

Architecture Review Board

Platform Operations Committee

2.5 AI Governance Committee Responsibilities

- AI policy oversight
- Recommendation governance
- Explainability governance
- AI risk governance
- AI review approvals

2.6 Product Governance Board Responsibilities

- Strategic AI oversight
- AI investment approvals
- AI risk acceptance

2.7 Compliance Committee Responsibilities

- Regulatory alignment
- Audit readiness
- Compliance assessments

2.8 Architecture Review Board Responsibilities

- Architecture governance
- Technical review
- Design validation

2.9 Governance Roles

AI Governance Lead

AI Risk Manager

Governance Review Lead

Compliance Manager

Executive Sponsor

2.10 Escalation Model

Operations

→ Governance Review

→ AI Governance Committee

→ Product Governance Board

2.11 Decision Categories

Category A

Strategic AI Decisions

Category B

Operational AI Decisions

Category C

Risk Decisions

Category D

Compliance Decisions

2.12 Governance Review Cadence

Monthly

AI Governance Review

Quarterly

Executive AI Review

Annually

AI Governance Effectiveness Assessment

2.13 Metrics

- Governance Decision Cycle Time
- Escalation Resolution Rate
- Governance Review Completion Rate

2.14 Audit Requirements

Maintain:

- Governance Minutes
- Decision Logs
- Escalation Records

2.15 Ownership

Primary Owner:

AI Governance Lead

Review Authority:

AI Governance Committee

2.16 Traceability

RTM References:

- AIGOV-ORG-001
- AIGOV-ORG-002
- DEC-001

2.17 Section Summary

This section defines governance bodies, decision authorities, oversight structures, escalation procedures, and accountability frameworks supporting TODP AI governance.

AI GOVERNANCE FRAMEWORK

Section 3 – AI Strategy & Responsible AI Governance

3.1 Purpose

Define governance requirements governing AI strategy, responsible AI principles, long-term AI direction, and strategic AI investment decisions.

3.2 Objectives

- Align AI initiatives with business strategy.
- Promote responsible AI usage.
- Support sustainable AI growth.
- Reduce strategic AI risk.
- Enable long-term governance maturity.

3.3 Scope

Applies to:

- AI strategy
- Recommendation strategy
- Explainability strategy
- AI investment planning

- Responsible AI initiatives

3.4 Responsible AI Principles

- Transparency
- Explainability
- Accountability
- Human Oversight
- Auditability
- Reliability

3.5 Strategic Governance Lifecycle

Vision

- Planning
- Prioritization
- Investment
- Execution
- Assessment

3.6 Strategic Inputs

- Customer requirements
- Governance reviews
- Risk assessments
- Operational metrics
- Market analysis

3.7 Strategic Review Requirements

Quarterly

AI Strategy Review

Annually

Responsible AI Assessment

3.8 Strategic Decision Requirements

Include:

- Business rationale
- Governance assessment
- Risk analysis
- Success criteria

3.9 Strategic Outcome Governance

Monitor:

- Adoption
- Governance effectiveness
- Customer trust

- Operational performance

3.10 Metrics

- AI Strategy Success Rate
- Responsible AI Compliance Rate
- Governance Maturity Score

3.11 Audit Requirements

Maintain:

- Strategic Plans
- Governance Reviews
- Assessment Reports

3.12 Ownership

Primary Owner:

Chief Product Officer

Review Authority:

AI Governance Committee

Approval Authority:

Product Governance Board

3.13 Traceability

RTM References:

- AISTRAT-001
- AISTRAT-002
- STRAT-001

3.14 Section Summary

This section defines AI strategy governance requirements, responsible AI principles, investment governance controls, and strategic oversight mechanisms supporting TODP AI operations.

AI GOVERNANCE FRAMEWORK

Section 4 – Explainability Governance Framework

4.1 Purpose

Define governance requirements ensuring explainability, interpretability, transparency, and evidence visibility throughout TODP recommendation workflows.

4.2 Objectives

- Enable understandable recommendations.
- Improve user trust.

- Support governance review.
- Facilitate audit readiness.
- Maintain recommendation transparency.

4.3 Scope

Applies to:

- Retrieval outputs
- Ranking outputs
- Recommendations
- Governance decisions
- Replay workflows

4.4 Explainability Principles

- Evidence Visibility
- Recommendation Transparency
- Decision Traceability
- Human Understandability

4.5 Explainability Components

Component A

Evidence Traceability

Component B

Retrieval Visibility

Component C

Ranking Visibility

Component D

Recommendation Rationale

Component E

Governance Visibility

4.6 Explainability Requirements

Recommendations shall expose:

- Supporting evidence
- Authority validation
- Retrieval sources
- Ranking rationale
- Governance outcomes

4.7 Governance Review Requirements

Validate:

- Explainability completeness
- Evidence coverage

- Traceability integrity

4.8 Explainability Reviews

Monthly

Explainability Assessment

Quarterly

Transparency Review

4.9 Success Criteria

Users shall be able to understand:

- Why a recommendation occurred
- What evidence was used
- How decisions were governed

4.10 Metrics

- Explainability Coverage
- Transparency Score
- Governance Validation Rate

4.11 Audit Requirements

Maintain:

- Explainability Reviews
- Governance Assessments
- Validation Records

4.12 Ownership

Primary Owner:

Explainability Governance Lead

Review Authority:

AI Governance Committee

4.13 Traceability

RTM References:

- EXP-001
- EXP-002
- TRACE-001

4.14 Section Summary

This section defines explainability governance controls, transparency requirements, review mechanisms, and audit obligations supporting TODP recommendation trustworthiness.

AI GOVERNANCE FRAMEWORK

Section 5 – Traceability, Auditability & Replay Governance

5.1 Purpose

Define governance requirements governing traceability, auditability, replayability, and decision reconstruction capabilities throughout TODP.

5.2 Objectives

- Enable full decision reconstruction.
- Support audit investigations.
- Improve governance assurance.
- Protect decision integrity.
- Support enterprise accountability.

5.3 Scope

Applies to:

- Opportunity processing
- Authority validation
- Evidence processing
- Retrieval execution
- Ranking execution

- Recommendation generation
- Governance review
- Audit workflows
- Replay workflows

5.4 Governance Principles

- Complete Traceability
- Immutable Auditability
- Replayability by Design
- Evidence Preservation

5.5 Traceability Chain

Opportunity

→ Authority

→ Evidence

→ Retrieval

→ Ranking

→ Recommendation

→ Governance

→ Audit

→ Replay

5.6 Replay Requirements

The platform shall support:

- Recommendation reconstruction
- Evidence reconstruction
- Governance reconstruction
- Audit validation

5.7 Auditability Requirements

Maintain:

- Decision identifiers
- Governance records
- Evidence references
- Review outcomes

5.8 Governance Reviews

Monthly

Auditability Assessment

Quarterly

Replay Effectiveness Review

5.9 Validation Requirements

Validate:

- Replay accuracy
- Traceability completeness
- Audit integrity

5.10 Metrics

- Replay Success Rate
- Traceability Coverage
- Audit Completeness Rate

5.11 Audit Requirements

Maintain:

- Replay Records
- Audit Logs
- Governance Records
- Validation Reports

5.12 Ownership

Primary Owner:

Audit Governance Lead

Review Authority:

AI Governance Committee

Approval Authority:

Product Governance Board

5.13 Traceability

RTM References:

- REPLAY-001
- REPLAY-002
- AUD-001
- TRACE-002

5.14 Section Summary

This section defines traceability governance controls, replay requirements, auditability standards, validation mechanisms, and oversight processes supporting TODP decision assurance.

AI GOVERNANCE FRAMEWORK

Section 6 – AI Risk Management Framework

6.1 Purpose

Define governance requirements governing identification, assessment, treatment, monitoring, reporting, and escalation of AI-related risks across TODP.

6.2 Objectives

- Reduce AI-related risk exposure.
- Improve governance visibility.
- Support responsible AI operation.
- Enable proactive risk management.
- Maintain enterprise trust.

6.3 Scope

Applies to:

- Retrieval operations
- Ranking operations
- Recommendation generation
- Governance workflows
- Audit workflows
- Replay workflows

6.4 Risk Governance Principles

- Risk Transparency
- Continuous Monitoring
- Accountability
- Evidence-Based Assessment
- Controlled Risk Acceptance

6.5 AI Risk Lifecycle

Risk Identification

→ Risk Assessment

→ Risk Classification

→ Treatment Planning

→ Monitoring

→ Reporting

→ Closure

6.6 AI Risk Categories

Category A

Explainability Risk

Category B

Traceability Risk

Category C

Operational Risk

Category D

Governance Risk

Category E

Compliance Risk

Category F

Recommendation Risk

6.7 Risk Assessment Criteria

Evaluate:

- Likelihood
- Business Impact
- Customer Impact
- Governance Impact
- Regulatory Exposure

6.8 Risk Treatment Options

- Mitigate
- Transfer
- Accept
- Avoid

6.9 Escalation Requirements

Escalation required when:

- Governance controls fail
- Traceability is compromised
- Explainability requirements are not met
- Risk exceeds approved tolerance

6.10 Risk Monitoring Requirements

Monitor:

- Recommendation anomalies
- Governance exceptions
- Replay failures
- Audit failures

6.11 Reporting Requirements

Monthly

AI Risk Report

Quarterly

AI Risk Assessment

Annually

AI Risk Effectiveness Review

6.12 Metrics

- Open AI Risks

- High-Risk Findings
- Risk Closure Rate
- Risk Mitigation Effectiveness

6.13 Audit Requirements

Maintain:

- AI Risk Registers
- Treatment Plans
- Risk Reviews
- Escalation Records

6.14 Ownership

Primary Owner:

AI Risk Manager

Review Authority:

AI Governance Committee

Approval Authority:

Product Governance Board

6.15 Traceability

RTM References:

- AIRISK-001
- AIRISK-002
- RISK-001
- GOV-RISK-001

6.16 Section Summary

This section defines AI risk governance processes, assessment methodologies, treatment controls, reporting requirements, and audit obligations supporting TODP responsible AI operations.

AI GOVERNANCE FRAMEWORK

Section 7 – Retrieval Governance Framework

7.1 Purpose

Define governance requirements governing evidence retrieval operations, retrieval transparency, retrieval quality, and retrieval traceability across TODP.

7.2 Objectives

- Improve retrieval reliability.
- Maintain retrieval transparency.
- Support recommendation integrity.
- Enable auditability.

- Reduce retrieval-related risk.

7.3 Scope

Applies to:

- Retrieval Module
- Evidence Module
- Governance Module
- Audit Module
- Replay Module

7.4 Governance Principles

- Retrieval Transparency
- Source Accountability
- Evidence Traceability
- Governance Oversight

7.5 Retrieval Governance Lifecycle

Source Registration

→ Retrieval Execution

→ Validation

→ Governance Review

→ Monitoring

→ Audit

7.6 Retrieval Governance Requirements

All retrieval operations shall maintain:

- Source references
- Retrieval timestamps
- Retrieval identifiers
- Governance visibility

7.7 Source Governance Requirements

Validate:

- Source legitimacy
- Source ownership
- Source accessibility
- Source integrity

7.8 Retrieval Quality Controls

Review:

- Retrieval relevance
- Retrieval completeness
- Retrieval consistency
- Retrieval traceability

7.9 Governance Reviews

Monthly

Retrieval Governance Review

Quarterly

Retrieval Effectiveness Assessment

7.10 Monitoring Requirements

Monitor:

- Retrieval failures
- Retrieval latency
- Source quality issues
- Retrieval anomalies

7.11 Metrics

- Retrieval Success Rate
- Retrieval Traceability Coverage
- Source Validation Rate
- Retrieval Quality Score

7.12 Audit Requirements

Maintain:

- Retrieval Logs
- Validation Reports
- Governance Reviews
- Monitoring Reports

7.13 Ownership

Primary Owner:

Retrieval Governance Lead

Review Authority:

AI Governance Committee

7.14 Traceability

RTM References:

- RET-GOV-001
- RET-GOV-002
- RETR-001
- TRACE-003

7.15 Section Summary

This section defines retrieval governance controls, source validation requirements, monitoring obligations, governance reviews, and audit requirements supporting TODP evidence retrieval.

AI GOVERNANCE FRAMEWORK

Section 8 – Ranking Governance Framework

8.1 Purpose

Define governance requirements governing ranking operations, ranking transparency, ranking validation, and ranking oversight within TODP.

8.2 Objectives

- Improve ranking reliability.
- Support recommendation quality.
- Maintain transparency.
- Enable governance oversight.
- Reduce ranking-related risks.

8.3 Scope

Applies to:

- Ranking Module

- Retrieval Module
- Recommendation Module
- Governance Module

8.4 Governance Principles

- Ranking Transparency
- Ranking Explainability
- Consistency
- Accountability

8.5 Ranking Governance Lifecycle

Input Validation

- Ranking Execution
- Governance Validation
- Monitoring
- Assessment

8.6 Ranking Governance Requirements

Maintain visibility into:

- Ranking inputs
- Ranking outputs
- Ranking rationale
- Ranking outcomes

8.7 Validation Controls

Validate:

- Ranking consistency
- Ranking traceability
- Ranking explainability
- Ranking integrity

8.8 Governance Reviews

Monthly

Ranking Governance Review

Quarterly

Ranking Effectiveness Assessment

8.9 Monitoring Requirements

Monitor:

- Ranking anomalies
- Ranking drift indicators
- Ranking inconsistencies

- Governance exceptions

8.10 Reporting Requirements

Reports shall include:

- Ranking quality
- Ranking risks
- Governance findings

8.11 Metrics

- Ranking Consistency Score
- Ranking Governance Compliance
- Ranking Validation Rate
- Ranking Quality Score

8.12 Audit Requirements

Maintain:

- Ranking Assessments
- Governance Reviews
- Validation Reports
- Monitoring Records

8.13 Ownership

Primary Owner:

Ranking Governance Lead

Review Authority:

AI Governance Committee

8.14 Traceability

RTM References:

- RANK-GOV-001
- RANK-GOV-002
- RANK-001
- TRACE-004

8.15 Section Summary

This section defines ranking governance requirements, transparency controls, validation procedures, monitoring standards, and audit obligations supporting TODP ranking operations.

AI GOVERNANCE FRAMEWORK

Section 9 – Recommendation Governance Framework

9.1 Purpose

Define governance requirements governing recommendation generation, recommendation validation, recommendation oversight, and recommendation accountability.

9.2 Objectives

- Ensure recommendation quality.
- Maintain recommendation explainability.
- Support governance review.
- Improve trustworthiness.
- Reduce recommendation risk.

9.3 Scope

Applies to:

- Recommendation Module
- Governance Module
- Audit Module
- Replay Module

9.4 Governance Principles

- Recommendation Transparency
- Explainability
- Traceability
- Accountability

9.5 Recommendation Lifecycle

Evidence Evaluation

→ Retrieval Review

→ Ranking Review

→ Recommendation Generation

→ Governance Validation

→ Audit

9.6 Governance Requirements

Recommendations shall maintain:

- Recommendation ID
- Evidence references
- Ranking references
- Governance references

9.7 Recommendation Validation Controls

Validate:

- Recommendation integrity
- Evidence support
- Explainability coverage
- Governance compliance

9.8 Recommendation Reviews

Monthly

Recommendation Assessment

Quarterly

Recommendation Effectiveness Review

9.9 Monitoring Requirements

Monitor:

- Recommendation anomalies
- Governance exceptions
- Explainability failures
- Replay failures

9.10 Reporting Requirements

Reports shall include:

- Recommendation quality
- Recommendation risks
- Governance outcomes

9.11 Metrics

- Recommendation Quality Score
- Explainability Coverage
- Governance Compliance Rate
- Recommendation Acceptance Rate

9.12 Audit Requirements

Maintain:

- Recommendation Records
- Governance Reviews
- Validation Reports
- Audit Logs

9.13 Ownership

Primary Owner:

Recommendation Governance Lead

Review Authority:

AI Governance Committee

9.14 Traceability

RTM References:

- REC-GOV-001
- REC-GOV-002
- REC-001
- TRACE-005

9.15 Section Summary

This section defines recommendation governance controls, validation standards, oversight requirements, monitoring obligations, and audit requirements supporting TODP recommendation management.

AI GOVERNANCE FRAMEWORK

Section 10 – Human Oversight & Governance Review Framework

10.1 Purpose

Define governance requirements governing human review, escalation oversight, intervention mechanisms, governance validation, and accountable decision supervision.

10.2 Objectives

- Maintain human accountability.
- Support governance validation.
- Enable intervention when required.
- Reduce governance risk.

- Improve decision trustworthiness.

10.3 Scope

Applies to:

- Recommendation reviews
- Governance reviews
- Escalated evaluations
- Compliance reviews
- Audit investigations

10.4 Governance Principles

- Human Accountability
- Independent Review
- Governance Transparency
- Risk-Aware Intervention

10.5 Oversight Lifecycle

Recommendation

→ Governance Review

→ Human Assessment

→ Approval or Escalation

→ Audit Capture

10.6 Human Review Triggers

- Governance exceptions
- High-risk recommendations
- Compliance concerns
- Audit requests
- Executive reviews

10.7 Governance Review Requirements

Review:

- Evidence quality
- Retrieval integrity
- Ranking integrity
- Recommendation rationale
- Governance outcomes

10.8 Escalation Requirements

Escalation path:

Reviewer

→ Governance Lead

→ AI Governance Committee

→ Product Governance Board

10.9 Review Documentation Requirements

Maintain:

- Review identifier
- Reviewer
- Findings
- Decision rationale
- Approval evidence

10.10 Review Cadence

Monthly

Governance Review Assessment

Quarterly

Human Oversight Effectiveness Review

10.11 Metrics

- Human Review Completion Rate
- Governance Escalation Rate
- Review Effectiveness Score
- Governance Validation Rate

10.12 Audit Requirements

Maintain:

- Review Records
- Escalation Records
- Approval Logs
- Assessment Reports

10.13 Ownership

Primary Owner:

Governance Review Lead

Review Authority:

AI Governance Committee

Approval Authority:

Product Governance Board

10.14 Traceability

RTM References:

- HOV-001
- HOV-002
- GOVREV-001

- AUD-002

10.15 Section Summary

This section defines human oversight requirements, governance review procedures, escalation mechanisms, documentation standards, and audit obligations supporting accountable TODP decision governance.

AI GOVERNANCE FRAMEWORK

Section 11 – AI Compliance & Regulatory Governance

11.1 Purpose

Define governance requirements governing compliance management, regulatory alignment, policy adherence, and compliance oversight for AI-assisted capabilities within TODP.

11.2 Objectives

- Maintain compliance readiness.
- Support enterprise procurement reviews.
- Reduce regulatory exposure.
- Improve governance assurance.
- Enable audit-ready operations.

11.3 Scope

Applies to:

- Retrieval processes
- Ranking processes
- Recommendation processes
- Governance workflows
- Audit workflows
- Replay workflows

11.4 Governance Principles

- Compliance by Design
- Accountability
- Traceability
- Auditability
- Continuous Readiness

11.5 Compliance Governance Lifecycle

Control Definition

→ Implementation

→ Monitoring

→ Assessment

→ Remediation

→ Validation

11.6 Compliance Domains

Domain A

Governance Compliance

Domain B

Security Compliance

Domain C

Data Governance Compliance

Domain D

Operational Compliance

Domain E

AI Governance Compliance

11.7 Compliance Review Requirements

Validate:

- Control effectiveness
- Policy adherence
- Evidence availability
- Traceability completeness

11.8 Regulatory Change Management

Monitor:

- Regulatory updates
- Industry standards
- Contractual obligations
- Customer requirements

11.9 Governance Reviews

Monthly

Compliance Review

Quarterly

Regulatory Alignment Assessment

Annually

AI Compliance Effectiveness Assessment

11.10 Reporting Requirements

Reports shall include:

- Compliance posture
- Open findings
- Remediation progress
- Governance risks

11.11 Metrics

- Compliance Rate
- Open Findings
- Remediation Completion Rate
- Compliance Assessment Score

11.12 Audit Requirements

Maintain:

- Compliance Reports
- Control Assessments
- Validation Records
- Remediation Plans

11.13 Ownership

Primary Owner:

AI Compliance Manager

Review Authority:

Compliance & Governance Committee

Approval Authority:

Product Governance Board

11.14 Traceability

RTM References:

- AICOMP-001
- AICOMP-002
- COMP-001
- CTRL-001

11.15 Section Summary

This section defines AI compliance governance processes, regulatory oversight mechanisms, assessment requirements, reporting obligations, and audit controls supporting TODP enterprise readiness.

AI GOVERNANCE FRAMEWORK

Section 12 – AI Security Governance Framework

12.1 Purpose

Define governance requirements governing security controls, security validation, security monitoring, and security oversight supporting TODP AI-assisted decision operations.

12.2 Objectives

- Protect AI-enabled workflows.
- Reduce security risks.
- Support secure operations.
- Maintain enterprise trust.
- Enable security accountability.

12.3 Scope

Applies to:

- Retrieval infrastructure
- Ranking infrastructure
- Recommendation infrastructure
- Governance systems
- Audit systems
- Replay systems

12.4 Governance Principles

- Security by Design
- Least Privilege
- Defense in Depth
- Continuous Monitoring
- Accountability

12.5 Security Governance Lifecycle

Security Planning

→ Control Implementation

→ Validation

→ Monitoring

→ Assessment

→ Improvement

12.6 Security Control Areas

Area A

Identity & Access Management

Area B

Data Protection

Area C

Infrastructure Security

Area D

Application Security

Area E

Security Monitoring

12.7 Security Validation Requirements

Validate:

- Access controls
- Encryption controls
- Monitoring controls
- Logging controls
- Recovery controls

12.8 Security Monitoring Requirements

Monitor:

- Unauthorized access
- Security anomalies
- Control failures
- Security incidents

12.9 Governance Reviews

Monthly

Security Governance Review

Quarterly

Security Posture Assessment

Annually

AI Security Effectiveness Review

12.10 Alignment Requirements

Security governance shall align with:

- SECURITY ARCHITECTURE V1
- OPS RUNBOOK V1
- COMPLIANCE PACKAGE V1

12.11 Metrics

- Security Findings
- Security Incident Volume
- Control Compliance Rate
- Vulnerability Closure Rate

12.12 Audit Requirements

Maintain:

- Security Assessments
- Monitoring Reports
- Incident Reports
- Validation Records

12.13 Ownership

Primary Owner:

Chief Information Security Officer

Review Authority:

AI Governance Committee

Approval Authority:

Product Governance Board

12.14 Traceability

RTM References:

- AISEC-001
- AISEC-002
- SEC-001
- SEC-CTRL-001

12.15 Section Summary

This section defines AI security governance controls, validation requirements, monitoring standards, oversight responsibilities, and audit obligations supporting TODP security assurance.

Section 13 – AI Data Governance Framework

13.1 Purpose

Define governance requirements governing information assets, evidence assets, governance records, audit records, and data lifecycle management supporting AI-assisted decision operations.

13.2 Objectives

- Maintain information integrity.
- Improve data quality.
- Support governance accountability.
- Protect sensitive information.
- Enable trusted decision support.

13.3 Scope

Applies to:

- Opportunity data
- Authority data
- Evidence data
- Retrieval data
- Ranking data
- Recommendation data
- Governance data
- Audit data

- Replay data

13.4 Governance Principles

- Data Ownership
- Data Integrity
- Controlled Access
- Lifecycle Governance
- Accountability

13.5 Data Governance Lifecycle

Creation

→ Classification

→ Storage

→ Usage

→ Retention

→ Disposal

13.6 Governance Roles

Data Owners

Data Stewards

Data Custodians

Governance Team

13.7 Data Classification Requirements

Classifications:

Public

Internal

Confidential

Restricted

13.8 Data Quality Governance

Review:

- Accuracy
- Completeness
- Consistency
- Timeliness

13.9 Governance Reviews

Monthly

Data Governance Review

Quarterly

Data Quality Assessment

Annually

AI Data Governance Assessment

13.10 Alignment Requirements

Data governance shall align with:

- DATA GOVERNANCE V1
- SECURITY ARCHITECTURE V1
- COMPLIANCE PACKAGE V1

13.11 Metrics

- Data Quality Score
- Data Governance Compliance Rate
- Data Integrity Rate
- Access Review Completion Rate

13.12 Audit Requirements

Maintain:

- Data Inventories
- Classification Registers
- Access Reviews
- Governance Reports

13.13 Ownership

Primary Owner:

Head of Data Governance

Review Authority:

AI Governance Committee

Approval Authority:

Product Governance Board

13.14 Traceability

RTM References:

- AIDATA-001
- AIDATA-002
- DATA-001
- DG-001

13.15 Section Summary

This section defines AI data governance controls, ownership requirements, lifecycle management standards, quality controls, and audit obligations supporting TODP information governance.

AI GOVERNANCE FRAMEWORK

Section 14 – AI Operational Governance Framework

14.1 Purpose

Define governance requirements governing day-to-day AI operations, operational controls, service management activities, monitoring activities, and operational accountability.

14.2 Objectives

- Ensure operational stability.
- Improve governance visibility.
- Support reliable AI operations.
- Enable measurable oversight.
- Reduce operational risk.

14.3 Scope

Applies to:

- Retrieval operations
- Ranking operations
- Recommendation operations
- Governance operations
- Audit operations
- Replay operations

14.4 Governance Principles

- Operational Accountability
- Service Reliability
- Controlled Execution
- Continuous Monitoring

14.5 Operational Governance Lifecycle

Execution

→ Monitoring

→ Review

→ Assessment

→ Improvement

14.6 Operational Review Areas

Area A

Availability

Area B

Performance

Area C

Reliability

Area D

Governance Compliance

Area E

Operational Risk

14.7 Monitoring Requirements

Monitor:

- Service health
- Operational failures
- Governance exceptions
- Replay failures

14.8 Escalation Requirements

Escalation path:

Operations Team

→ Governance Lead

→ AI Governance Committee

→ Product Governance Board

14.9 Governance Reviews

Daily

Operational Review

Weekly

Operational Governance Review

Monthly

Operational Effectiveness Review

14.10 Alignment Requirements

Operational governance shall align with:

- OPS RUNBOOK V1
- SUPPORT MODEL V1
- DEPLOYMENT GUIDE V1

14.11 Metrics

- Service Availability
- Incident Volume
- Governance Exception Rate
- Operational Effectiveness Score

14.12 Audit Requirements

Maintain:

- Operational Reports
- Monitoring Reports
- Escalation Records
- Governance Reviews

14.13 Ownership

Primary Owner:

AI Operations Manager

Review Authority:

Platform Operations Committee

Approval Authority:

AI Governance Committee

14.14 Traceability

RTM References:

- AIOPS-001
- AIOPS-002
- OPS-001
- MON-001

14.15 Section Summary

This section defines AI operational governance controls, monitoring requirements, escalation mechanisms, oversight responsibilities, and audit obligations supporting TODP operational excellence.

AI GOVERNANCE FRAMEWORK

Section 15 – AI Quality Assurance & Validation Governance

15.1 Purpose

Define governance requirements governing quality assurance, validation methodologies, testing controls, effectiveness assessments, and continuous quality improvement for AI-assisted capabilities.

15.2 Objectives

- Improve recommendation quality.
- Ensure governance effectiveness.

- Support reliable outcomes.
- Reduce operational defects.
- Maintain enterprise confidence.

15.3 Scope

Applies to:

- Retrieval validation
- Ranking validation
- Recommendation validation
- Governance validation
- Replay validation

15.4 Governance Principles

- Validation Before Trust
- Measurable Quality
- Continuous Assessment
- Independent Verification

15.5 Validation Lifecycle

Planning

→ Testing

→ Validation

→ Review

→ Approval

→ Monitoring

15.6 Validation Domains

Domain A

Retrieval Validation

Domain B

Ranking Validation

Domain C

Recommendation Validation

Domain D

Governance Validation

Domain E

Replay Validation

15.7 Validation Requirements

Validate:

- Accuracy
- Consistency
- Traceability

- Explainability
- Governance compliance

15.8 Review Requirements

Monthly

Validation Review

Quarterly

Quality Effectiveness Assessment

Annually

Governance Quality Assessment

15.9 Reporting Requirements

Reports shall include:

- Validation coverage
- Quality findings
- Governance issues
- Improvement actions

15.10 Alignment Requirements

Validation governance shall align with:

- TEST SPEC V1
- RTM V1
- PRODUCT GOVERNANCE MODEL

15.11 Metrics

- Validation Success Rate
- Quality Score
- Governance Validation Coverage
- Defect Detection Rate

15.12 Audit Requirements

Maintain:

- Validation Reports
- Testing Evidence
- Governance Reviews
- Assessment Records

15.13 Ownership

Primary Owner:

AI Quality Governance Lead

Review Authority:

AI Governance Committee

Approval Authority:

Product Governance Board

15.14 Traceability

RTM References:

- AIQUAL-001
- AIQUAL-002
- TEST-001
- VALID-001

15.15 Section Summary

This section defines AI quality governance controls, validation methodologies, review requirements, quality measurement standards, and audit obligations supporting TODP trustworthy decision operations.

AI GOVERNANCE FRAMEWORK

Section 16 – AI Monitoring, Observability & Governance Analytics

16.1 Purpose

Define governance requirements governing monitoring, observability, telemetry collection, governance analytics, performance visibility, and operational intelligence for AI-assisted decision operations.

16.2 Objectives

- Improve governance visibility.
- Enable proactive issue detection.
- Support operational accountability.
- Strengthen decision assurance.
- Enable evidence-based governance.

16.3 Scope

Applies to:

- Retrieval operations
- Ranking operations
- Recommendation operations
- Governance workflows
- Audit workflows
- Replay workflows

16.4 Governance Principles

- Continuous Monitoring
- Operational Transparency
- Evidence-Based Measurement

- Early Risk Detection

16.5 Monitoring Domains

Domain A

Operational Monitoring

Domain B

Governance Monitoring

Domain C

Recommendation Monitoring

Domain D

Replay Monitoring

Domain E

Compliance Monitoring

16.6 Observability Requirements

Capture:

- System events
- Governance events
- Recommendation events
- Audit events

- Replay events

16.7 Governance Analytics Requirements

Analyze:

- Governance trends
- Operational trends
- Recommendation trends
- Risk indicators

16.8 Alerting Requirements

Alerts shall be generated for:

- Governance failures
- Replay failures
- Traceability failures
- Critical operational anomalies

16.9 Review Requirements

Weekly

Monitoring Review

Monthly

Governance Analytics Review

Quarterly

Observability Effectiveness Assessment

16.10 Reporting Requirements

Reports shall include:

- Governance KPIs
- Operational KPIs
- Risk indicators
- Trend analysis

16.11 Metrics

- Monitoring Coverage
- Governance Visibility Score
- Alert Resolution Rate
- Observability Effectiveness Score

16.12 Audit Requirements

Maintain:

- Monitoring Records
- Alert Logs
- Analytics Reports
- Governance Reviews

16.13 Ownership

Primary Owner:

AI Operations Manager

Review Authority:

AI Governance Committee

Approval Authority:

Product Governance Board

16.14 Traceability

RTM References:

- AIMON-001
- AIMON-002
- OBS-001
- GOV-ANL-001

16.15 Section Summary

This section defines monitoring governance controls, observability requirements, governance analytics standards, alerting mechanisms, and audit obligations supporting TODP operational visibility.

AI GOVERNANCE FRAMEWORK

Section 17 – AI Incident Management & Governance Response

17.1 Purpose

Define governance requirements governing AI-related incident detection, response coordination, governance escalation, investigation procedures, and corrective action management.

17.2 Objectives

- Reduce incident impact.
- Improve response effectiveness.
- Strengthen governance accountability.
- Protect decision integrity.
- Enable rapid recovery.

17.3 Scope

Applies to:

- Recommendation incidents
- Explainability incidents

- Traceability incidents
- Governance incidents
- Replay incidents
- Compliance incidents

17.4 Governance Principles

- Rapid Detection
- Coordinated Response
- Accountability
- Evidence Preservation
- Continuous Learning

17.5 Incident Lifecycle

Detection

→ Classification

→ Investigation

→ Containment

→ Resolution

→ Validation

→ Closure

17.6 Incident Severity Levels

Severity 1

Critical Governance Failure

Severity 2

Major Governance Impact

Severity 3

Moderate Impact

Severity 4

Minor Impact

17.7 Incident Governance Requirements

Maintain:

- Incident identifier
- Incident owner
- Root cause analysis
- Resolution evidence
- Governance review

17.8 Escalation Requirements

Severity 1 and Severity 2 incidents shall be escalated to:

- AI Governance Committee
- Executive Leadership Team
- Product Governance Board

17.9 Post-Incident Reviews

Validate:

- Root cause accuracy
- Corrective actions
- Governance improvements
- Risk mitigation effectiveness

17.10 Reporting Requirements

Monthly

AI Incident Report

Quarterly

Incident Trend Assessment

Annually

Incident Governance Review

17.11 Metrics

- Incident Volume

- Mean Time to Resolution
- Incident Recurrence Rate
- Corrective Action Completion Rate

17.12 Audit Requirements

Maintain:

- Incident Records
- Investigation Reports
- Corrective Action Plans
- Review Reports

17.13 Ownership

Primary Owner:

AI Incident Manager

Review Authority:

AI Governance Committee

Approval Authority:

Product Governance Board

17.14 Traceability

RTM References:

- AIINC-001
- AIINC-002
- IR-001
- GOV-IR-001

17.15 Section Summary

This section defines AI incident governance procedures, escalation standards, investigation requirements, corrective action processes, and audit obligations supporting TODP governance resilience.

AI GOVERNANCE FRAMEWORK

Section 18 – AI Ethics, Accountability & Decision Integrity Governance

18.1 Purpose

Define governance requirements ensuring ethical operation, accountable decision support, integrity of recommendations, and responsible use of AI-assisted capabilities.

18.2 Objectives

- Promote responsible decision support.
- Strengthen accountability.
- Protect stakeholder trust.
- Improve governance maturity.

- Maintain decision integrity.

18.3 Scope

Applies to:

- Recommendations
- Governance decisions
- Review processes
- Escalation processes
- Audit processes

18.4 Governance Principles

- Accountability
- Transparency
- Explainability
- Human Responsibility
- Decision Integrity

18.5 Ethical Governance Requirements

The platform shall ensure:

- Transparent recommendations
- Explainable outcomes
- Traceable decisions

- Human review capability

18.6 Accountability Framework

Product Teams

Responsible for implementation

Governance Teams

Responsible for oversight

Executive Leadership

Responsible for accountability

18.7 Decision Integrity Controls

Validate:

- Evidence integrity
- Authority integrity
- Recommendation integrity
- Governance integrity

18.8 Ethical Review Requirements

Quarterly

Decision Integrity Assessment

Annually

Responsible AI Governance Review

18.9 Governance Escalation Requirements

Escalate concerns involving:

- Governance failures
- Decision integrity concerns
- Traceability failures
- Significant stakeholder impact

18.10 Reporting Requirements

Reports shall include:

- Integrity findings
- Governance observations
- Improvement recommendations

18.11 Metrics

- Decision Integrity Score
- Accountability Compliance Rate
- Governance Escalation Rate
- Ethical Review Completion Rate

18.12 Audit Requirements

Maintain:

- Ethics Reviews
- Integrity Assessments
- Governance Reviews
- Escalation Records

18.13 Ownership

Primary Owner:

AI Governance Lead

Review Authority:

AI Governance Committee

Approval Authority:

Product Governance Board

18.14 Traceability

RTM References:

- AIETH-001
- AIETH-002
- INTEGRITY-001
- GOV-ETH-001

18.15 Section Summary

This section defines ethical governance controls, accountability frameworks, integrity validation standards, oversight responsibilities, and audit obligations supporting TODP trustworthy decision support.

AI GOVERNANCE FRAMEWORK

Section 19 – AI Governance Maturity Assessment Framework

19.1 Purpose

Define governance requirements governing AI governance maturity measurement, capability assessment, improvement planning, and long-term governance evolution.

19.2 Objectives

- Measure governance effectiveness.
- Identify capability gaps.
- Improve governance maturity.

- Support strategic planning.
- Enable continuous improvement.

19.3 Scope

Applies to:

- Governance processes
- Risk management
- Compliance management
- Explainability management
- Audit management
- Replay management

19.4 Governance Principles

- Measurable Progress
- Objective Assessment
- Continuous Learning
- Sustainable Improvement

19.5 Assessment Domains

Domain A

Strategy Governance

Domain B

Operational Governance

Domain C

Risk Governance

Domain D

Compliance Governance

Domain E

Audit Governance

Domain F

Replay Governance

19.6 Maturity Levels

Level 1

Initial

Level 2

Managed

Level 3

Defined

Level 4

Measured

Level 5

Optimized

19.7 Assessment Lifecycle

Assessment Planning

→ Evaluation

→ Gap Analysis

→ Improvement Planning

→ Implementation

→ Validation

19.8 Assessment Criteria

Evaluate:

- Governance effectiveness
- Risk management maturity
- Compliance maturity
- Audit readiness
- Operational maturity

19.9 Review Requirements

Quarterly

Governance Maturity Review

Annually

Enterprise AI Governance Assessment

19.10 Improvement Planning Requirements

Plans shall include:

- Owner
- Timeline
- Objectives
- Validation criteria

19.11 Metrics

- Governance Maturity Score
- Improvement Completion Rate
- Assessment Completion Rate
- Governance Effectiveness Index

19.12 Audit Requirements

Maintain:

- Assessment Reports

- Gap Analyses
- Improvement Plans
- Validation Reports

19.13 Ownership

Primary Owner:

AI Governance Excellence Lead

Review Authority:

AI Governance Committee

Approval Authority:

Product Governance Board

19.14 Traceability

RTM References:

- AIMAT-001
- AIMAT-002
- MAT-001
- IMP-001

19.15 Section Summary

This section defines governance maturity assessment methodologies, evaluation criteria, improvement planning requirements, and oversight mechanisms supporting TODP AI governance excellence.

AI GOVERNANCE FRAMEWORK

Section 20 – AI Vendor, Third-Party & Dependency Governance

20.1 Purpose

Define governance requirements governing external AI services, third-party dependencies, vendor-provided capabilities, and ecosystem risk management affecting TODP.

20.2 Objectives

- Reduce third-party risk.
- Improve dependency visibility.
- Maintain governance oversight.
- Strengthen operational resilience.
- Support enterprise procurement readiness.

20.3 Scope

Applies to:

- AI infrastructure vendors
- Cloud providers

- External APIs
- Monitoring providers
- Security providers
- Governance tooling providers

20.4 Governance Principles

- Vendor Accountability
- Risk Transparency
- Continuous Oversight
- Contractual Governance

20.5 Vendor Lifecycle

Assessment

- Approval
- Onboarding
- Monitoring
- Review
- Renewal or Exit

20.6 Vendor Governance Requirements

Maintain:

- Vendor inventory
- Risk ratings

- Security reviews
- Compliance reviews

20.7 Assessment Criteria

Evaluate:

- Security posture
- Operational maturity
- Governance maturity
- Business continuity capability

20.8 Monitoring Requirements

Monitor:

- SLA compliance
- Security events
- Service performance
- Governance issues

20.9 Review Requirements

Quarterly

Vendor Governance Review

Annually

Third-Party Risk Assessment

20.10 Reporting Requirements

Reports shall include:

- Vendor risk posture
- Dependency inventory
- Governance findings
- Mitigation plans

20.11 Metrics

- Vendor Compliance Rate
- Vendor Risk Rating
- SLA Compliance Rate
- Critical Dependency Coverage

20.12 Audit Requirements

Maintain:

- Vendor Assessments
- Contracts
- Review Reports

- Risk Registers

20.13 Ownership

Primary Owner:

Vendor Governance Manager

Review Authority:

AI Governance Committee

Approval Authority:

Product Governance Board

20.14 Traceability

RTM References:

- AIVND-001
- AIVND-002
- VND-001
- TPRM-001

20.15 Section Summary

This section defines third-party governance controls, vendor oversight requirements, dependency management standards, monitoring obligations, and audit requirements supporting TODP AI ecosystem governance.

AI GOVERNANCE FRAMEWORK

Section 21 – AI Lifecycle Governance Framework

21.1 Purpose

Define governance requirements governing the complete lifecycle of AI-enabled capabilities from strategic conception through retirement within TODP.

21.2 Objectives

- Ensure controlled lifecycle management.
- Maintain governance visibility.
- Support long-term sustainability.
- Reduce unmanaged operational complexity.
- Enable accountable evolution.

21.3 Scope

Applies to:

- Retrieval capabilities
- Ranking capabilities
- Recommendation capabilities
- Governance capabilities
- Audit capabilities
- Replay capabilities

21.4 Governance Principles

- Lifecycle Accountability
- Controlled Evolution
- Governance by Design
- Continuous Assessment

21.5 Lifecycle Stages

Concept

- Evaluation
- Planning
- Design
- Validation
- Deployment
- Operations
- Improvement
- Retirement

21.6 Governance Requirements

Each lifecycle stage shall maintain:

- Defined owner
- Approval criteria
- Success metrics
- Risk assessment

- Governance review

21.7 Lifecycle Review Requirements

Validate:

- Strategic alignment
- Governance compliance
- Operational viability
- Business value

21.8 Retirement Governance

Retirement activities shall include:

- Impact assessment
- Dependency analysis
- Customer communication plan
- Audit preservation plan

21.9 Review Cadence

Quarterly

Lifecycle Governance Review

Annually

Lifecycle Effectiveness Assessment

21.10 Metrics

- Lifecycle Governance Compliance
- Capability Adoption Rate
- Retirement Success Rate
- Lifecycle Assessment Completion Rate

21.11 Audit Requirements

Maintain:

- Lifecycle Registers
- Approval Records
- Retirement Plans
- Governance Reviews

21.12 Ownership

Primary Owner:

AI Lifecycle Governance Lead

Review Authority:

AI Governance Committee

Approval Authority:

Product Governance Board

21.13 Traceability

RTM References:

- AILIFE-001
- AILIFE-002
- LIFE-001
- GOV-LIFE-001

21.14 Section Summary

This section defines lifecycle governance controls, stage-gate requirements, retirement governance procedures, and oversight mechanisms supporting TODP AI capability management.

AI GOVERNANCE FRAMEWORK

Section 22 – AI Documentation, Evidence & Records Governance

22.1 Purpose

Define governance requirements governing documentation management, evidence preservation, records retention, and governance artifact management supporting AI oversight activities.

22.2 Objectives

- Preserve governance evidence.
- Support audit readiness.
- Improve information accessibility.
- Maintain governance traceability.
- Enable regulatory assurance.

22.3 Scope

Applies to:

- Governance documents
- Review records
- Risk assessments
- Validation reports
- Audit artifacts
- Replay evidence

22.4 Governance Principles

- Documentation Integrity
- Controlled Access
- Evidence Preservation
- Retention Accountability

22.5 Documentation Lifecycle

Creation

→ Review

→ Approval

→ Publication

→ Retention

→ Disposal

22.6 Required Documentation Categories

Category A

Governance Documentation

Category B

Risk Documentation

Category C

Compliance Documentation

Category D

Validation Documentation

Category E

Audit Documentation

22.7 Documentation Requirements

All governance records shall maintain:

- Unique identifier
- Owner
- Approval status
- Retention classification
- Review schedule

22.8 Retention Governance

Retention requirements shall align with:

- DATA GOVERNANCE V1
- COMPLIANCE PACKAGE V1
- SECURITY ARCHITECTURE V1

22.9 Review Requirements

Quarterly

Documentation Assessment

Annually

Records Governance Assessment

22.10 Metrics

- Documentation Completeness Rate
- Evidence Availability Rate
- Retention Compliance Rate
- Review Completion Rate

22.11 Audit Requirements

Maintain:

- Documentation Inventories
- Retention Registers
- Approval Records
- Review Reports

22.12 Ownership

Primary Owner:

AI Governance Records Manager

Review Authority:

AI Governance Committee

Approval Authority:

Chief Compliance Officer

22.13 Traceability

RTM References:

- AIDOC-001
- AIDOC-002
- EVID-001
- REC-001

22.14 Section Summary

This section defines documentation governance controls, records management standards, evidence preservation requirements, and audit obligations supporting TODP governance transparency.

AI GOVERNANCE FRAMEWORK

Section 23 – AI Performance Governance & Outcome Measurement

23.1 Purpose

Define governance requirements governing performance measurement, outcome evaluation, recommendation effectiveness assessment, and strategic value realization.

23.2 Objectives

- Measure AI governance effectiveness.
- Evaluate recommendation outcomes.

- Support strategic decision-making.
- Improve governance accountability.
- Enable continuous optimization.

23.3 Scope

Applies to:

- Retrieval effectiveness
- Ranking effectiveness
- Recommendation effectiveness
- Governance effectiveness
- Replay effectiveness

23.4 Governance Principles

- Measurable Outcomes
- Transparency
- Accountability
- Continuous Improvement

23.5 Performance Governance Lifecycle

Objective Definition

→ KPI Selection

→ Measurement

→ Analysis

→ Review

→ Improvement

23.6 Performance Domains

Domain A

Operational Performance

Domain B

Recommendation Performance

Domain C

Governance Performance

Domain D

Audit Performance

Domain E

Replay Performance

23.7 Reporting Requirements

Monthly

AI Performance Report

Quarterly

Outcome Effectiveness Assessment

Annually

Enterprise AI Value Assessment

23.8 Governance Review Requirements

Review:

- KPI performance
- Governance outcomes
- Strategic alignment
- Improvement opportunities

23.9 Executive Oversight Requirements

Executive Leadership shall review:

- Governance effectiveness
- Operational performance
- Strategic outcomes
- Risk indicators

23.10 Metrics

- Recommendation Effectiveness Score
- Governance Effectiveness Score
- Replay Success Rate
- Strategic Outcome Achievement Rate

23.11 Audit Requirements

Maintain:

- KPI Reports
- Executive Reviews
- Outcome Assessments
- Improvement Plans

23.12 Ownership

Primary Owner:

AI Performance Governance Lead

Review Authority:

AI Governance Committee

Approval Authority:

Product Governance Board

23.13 Traceability

RTM References:

- AIPERF-001
- AIPERF-002
- KPI-001
- PERF-001

23.14 Section Summary

This section defines AI performance governance controls, KPI management standards, outcome measurement requirements, executive oversight mechanisms, and audit obligations supporting TODP value realization.

AI GOVERNANCE FRAMEWORK

Section 24 – Enterprise AI Governance Operating Model

24.1 Purpose

Define the operational model governing execution, oversight, coordination, monitoring, reporting, and continuous management of AI governance activities across TODP.

24.2 Objectives

- Standardize governance execution.
- Improve operational accountability.
- Support scalable governance operations.

- Strengthen oversight effectiveness.
- Maintain enterprise readiness.

24.3 Scope

Applies to:

- Governance operations
- Risk operations
- Compliance operations
- Audit operations
- Replay operations
- Monitoring operations

24.4 Governance Principles

- Operational Accountability
- Transparency
- Consistency
- Continuous Oversight

24.5 Governance Operating Structure

AI Governance Committee

AI Operations Team

Risk Management Team

Compliance Team

Audit Team

Executive Leadership Team

24.6 Governance Management Cycle

Plan

→ Govern

→ Monitor

→ Assess

→ Improve

24.7 Core Governance Processes

Risk Governance

Compliance Governance

Recommendation Governance

Audit Governance

Replay Governance

Quarterly

Executive Governance Review

Annually

Governance Operating Model Assessment

24.10 Metrics

- Governance Operations Effectiveness
- Governance Compliance Rate
- Governance Action Closure Rate
- Oversight Effectiveness Score

24.11 Audit Requirements

Maintain:

- Governance Dashboards
- Governance Reports
- Review Minutes
- Improvement Registers

24.12 Ownership

Primary Owner:

AI Governance Operations Lead

Review Authority:

AI Governance Committee

Approval Authority:

Product Governance Board

24.13 Traceability

RTM References:

- AIOPER-001
- AIOPER-002
- GOV-OPS-001
- EXEC-001

24.14 Section Summary

This section defines the AI governance operating model, governance management processes, reporting structures, oversight responsibilities, and operational accountability mechanisms supporting TODP AI governance execution.

AI GOVERNANCE FRAMEWORK

Section 25 – Enterprise AI Governance Maturity & Continuous Improvement Framework

25.1 Purpose

Establish the long-term maturity framework governing continuous improvement, governance optimization, capability enhancement, and enterprise-scale evolution of AI governance across TODP.

25.2 Objectives

- Improve governance maturity.

- Enhance operational effectiveness.
- Strengthen enterprise readiness.
- Support sustainable governance growth.
- Drive continuous improvement.

25.3 Scope

Applies to:

- Governance processes
- Risk management
- Compliance management
- Audit management
- Replay governance
- Operational governance

25.4 Governance Principles

- Continuous Learning
- Measurable Improvement
- Strategic Alignment
- Governance Excellence
- Sustainable Evolution

25.5 Maturity Assessment Domains

Domain A

Strategy Governance

Domain B

Operational Governance

Domain C

Risk Governance

Domain D

Compliance Governance

Domain E

Audit & Replay Governance

Domain F

Performance Governance

25.6 Maturity Levels

Level 1

Initial

Level 2

Managed

Level 3

Defined

Level 4

Measured

Level 5

Optimized

25.7 Assessment Lifecycle

Assessment

→ Gap Analysis

→ Improvement Planning

→ Implementation

→ Validation

→ Reassessment

25.8 Improvement Governance Requirements

Improvement initiatives shall include:

- Defined owner
- Measurable objectives
- Timeline
- Success criteria
- Validation plan

25.9 Executive Oversight

Executive Leadership Team shall review:

- Governance maturity progress
- Improvement effectiveness
- Strategic governance priorities
- Capability development plans

25.10 Review Requirements

Quarterly

Governance Maturity Review

Annually

Enterprise AI Governance Excellence Assessment

25.11 Success Criteria

The framework shall demonstrate:

- High governance effectiveness
- Strong audit readiness
- Sustainable operational maturity
- Continuous capability improvement

25.12 Metrics

- Governance Maturity Score
- Improvement Completion Rate
- Governance Effectiveness Index
- Audit Readiness Score

25.13 Audit Requirements

Maintain:

- Maturity Assessments
- Improvement Registers
- Governance Reviews
- Validation Reports

25.14 Ownership

Primary Owner:

Chief Product Officer

Review Authority:

AI Governance Committee

Approval Authority:

Product Governance Board

25.15 Traceability

RTM References:

- AIMAT-003
- AIMAT-004
- GOV-MAT-001
- IMP-001

25.16 Section Summary

This section establishes the enterprise AI governance maturity model, continuous improvement framework, capability assessment methodology, executive oversight requirements, and governance optimization processes supporting the long-term evolution of TODP AI governance.

END OF AI GOVERNANCE FRAMEWORK
