

SUPPORT MODEL V1

Section 1 – Support Governance Framework

1.1 Purpose

Establish the governance structure, operating principles, accountability model, and oversight mechanisms governing support operations for the Transparent Opportunity Decision Platform (TODP).

1.2 Objectives

- Provide consistent customer support.
- Ensure timely issue resolution.
- Maintain operational accountability.
- Support enterprise customer expectations.
- Enable auditability and traceability.
- Align support operations with governance requirements.

1.3 Scope

Applies to:

- Customer support operations
- Technical support operations
- Platform support activities
- Incident support activities
- Escalation management

- Service request management
- Enterprise customer support

Covered TODP Modules:

- Opportunity
- Authority
- Evidence
- Retrieval
- Ranking
- Recommendation
- Governance
- Audit
- Replay

1.4 Support Principles

- Customer First
- Transparency
- Accountability
- Timely Resolution
- Evidence-Based Support
- Continuous Improvement
- Operational Excellence

1.5 Governance Structure

Executive Oversight

→ Product Governance Board

Operational Oversight

→ Platform Operations Committee

Support Governance

→ Support Management Office

Execution Teams

→ Customer Support Team

→ Technical Support Team

→ Platform Engineering Team

→ Security Team

1.6 Support Operating Model

Customer Inquiry

→ Ticket Creation

→ Classification

→ Assignment

→ Investigation

→ Resolution

→ Validation

→ Closure

1.7 Support Governance Responsibilities

Product Governance Board

- Strategic oversight
- Service quality review
- Customer risk review

Platform Operations Committee

- Operational review
- SLA review
- Escalation review

Support Management Office

- Process governance
- Reporting oversight
- Quality assurance

Support Teams

- Ticket management
- Customer communication
- Resolution execution

1.8 Policy Alignment

Support operations shall comply with:

- OPS RUNBOOK V1
- SECURITY ARCHITECTURE V1
- DATA GOVERNANCE V1
- COMPLIANCE PACKAGE V1
- AI GOVERNANCE FRAMEWORK

1.9 Review Cadence

Daily

- Open ticket review
- Escalation review

Weekly

- SLA review
- Backlog review

Monthly

- Service quality review
- Customer satisfaction review

Quarterly

- Support governance assessment

1.10 Metrics

- Ticket Volume
- SLA Compliance
- Resolution Time
- Escalation Rate
- Customer Satisfaction
- First Contact Resolution Rate

1.11 Audit Requirements

Maintain:

- Ticket Records
- Escalation Records
- Resolution Evidence
- Customer Communications
- SLA Reports

1.12 Ownership

Primary Owner:

Head of Support Operations

Review Authority:

Platform Operations Committee

Approval Authority:

Product Governance Board

1.13 Traceability

RTM References:

- SUP-GOV-001
- SUP-GOV-002
- OPS-001
- AUD-SUP-001

1.14 Section Summary

This section establishes the governance framework, accountability model, oversight structure, reporting requirements, and audit controls governing TODP support operations.

SUPPORT MODEL V1

Section 2 – Support Organization & Responsibility Model

2.1 Purpose

Define support organization structure, ownership assignments, responsibility boundaries, and escalation accountability across TODP operations.

2.2 Objectives

- Establish clear ownership.
- Reduce operational ambiguity.
- Improve issue resolution efficiency.
- Support enterprise-grade service delivery.
- Enable effective escalation management.

2.3 Support Organization Structure

Level 1 Support

→ Customer Support Team

Level 2 Support

→ Technical Support Team

Level 3 Support

→ Engineering Teams

Level 4 Support

→ Executive & Governance Escalation

2.4 Support Domains

Domain A

Customer Support

Domain B

Technical Support

Domain C

Platform Support

Domain D

Security Support

Domain E

Governance Support

2.5 Ownership Matrix

Customer Support

Owner:

Customer Support Manager

Technical Support

Owner:

Technical Support Manager

Platform Services

Owner:

Platform Engineering Lead

Security Services

2.7 Responsibility Model

L1 Responsibilities

- Ticket intake
- Initial triage
- Customer communication
- Knowledge base usage

L2 Responsibilities

- Technical investigation
- Advanced troubleshooting
- Resolution execution

L3 Responsibilities

- Defect remediation
- Root cause analysis
- Platform changes

L4 Responsibilities

- Strategic decisions
- Risk acceptance
- Governance review

2.8 Escalation Ownership

Operational Issues

Owner:

Technical Support Team

Security Issues

Owner:

Service Availability Issues

Owner:

Platform Operations Team

2.9 Coverage Requirements

Business Hours Support

Customer Support Team

Extended Coverage

Technical Support Team

Critical Incident Coverage

24x7 On-Call Operations

2.10 Training Requirements

Support personnel shall receive training on:

- TODP architecture
- Support procedures
- Security awareness
- Incident management
- Escalation management

2.11 Metrics

- Ownership Coverage
- Escalation Accuracy
- Resolution Efficiency
- Support Utilization

2.12 Audit Requirements

Maintain:

- Ownership Records
- Escalation Logs
- Training Records
- Coverage Documentation

2.13 Ownership

Primary Owner:

Support Management Office

Review Authority:

Platform Operations Committee

2.14 Traceability

RTM References:

- SUP-ORG-001
- SUP-ORG-002
- OWN-001
- AUD-SUPORG-001

2.15 Section Summary

This section defines support organization structure, ownership assignments, escalation accountability, responsibility boundaries, coverage requirements, and governance controls supporting TODP support operations.

SUPPORT MODEL V1

Section 3 – Ticket Management & Request Lifecycle

3.1 Purpose

Establish standardized processes governing support ticket intake, classification, prioritization, assignment, resolution, validation, and closure across TODP support operations.

3.2 Objectives

- Ensure consistent request handling.
- Improve support responsiveness.
- Maintain traceable support records.
- Enable SLA compliance.
- Support operational reporting and governance.

3.3 Scope

Applies to:

- Incidents
- Service requests
- Customer inquiries
- Defect reports
- Feature clarification requests
- Access requests
- Governance inquiries

3.4 Ticket Management Principles

- Single Source of Truth
- Complete Traceability
- Timely Response
- Customer Transparency
- Evidence-Based Resolution

3.5 Ticket Lifecycle

Ticket Creation

→ Classification

→ Prioritization

→ Assignment

→ Investigation

→ Resolution

→ Validation

→ Closure

3.6 Ticket Categories

Category A

Incident

Category B

Service Request

Category C

Access Request

Category D

Problem Investigation

Category E

Feature Clarification

Category F

Governance Inquiry

3.7 Ticket Classification Requirements

Each ticket shall include:

- Ticket ID
- Customer Identifier
- Request Type
- Impact Assessment
- Priority Assignment
- Assigned Owner
- Status

3.8 Priority Levels

Priority 1

Critical

Priority 2

High

Priority 3

Medium

Priority 4

Low

Priority 5

Informational

3.9 Assignment Rules

L1 Support

Handles:

- Initial intake
- Standard requests

L2 Support

Handles:

- Technical troubleshooting
- Service degradation

L3 Support

Handles:

- Defects
- Platform failures
- Complex technical issues

L4 Support

Handles:

- Governance decisions
- Executive escalations

3.10 Resolution Requirements

Every resolution shall include:

- Resolution summary
- Resolution owner
- Resolution timestamp
- Supporting evidence
- Customer communication

3.11 Closure Requirements

A ticket may be closed only when:

- Resolution completed
- Validation completed
- Customer notified
- Documentation updated

3.12 Reopening Criteria

Tickets may be reopened when:

- Issue persists
- Resolution fails
- Additional evidence emerges
- Incorrect closure occurred

3.13 Reporting Requirements

Daily

- Open ticket summary

Weekly

- Backlog review

Monthly

- Ticket trend analysis

3.14 Metrics

- Ticket Volume
- Resolution Time
- Backlog Size
- Reopen Rate
- First Contact Resolution Rate

3.15 Audit Requirements

Maintain:

- Ticket Records
- Resolution Evidence

- Communication Logs
- Closure Records

3.16 Ownership

Primary Owner:

Technical Support Manager

Review Authority:

Support Management Office

3.17 Traceability

RTM References:

- TKT-001
- TKT-002
- SUP-OPS-001
- AUD-TKT-001

3.18 Section Summary

This section defines ticket lifecycle management, classification standards, assignment rules, resolution requirements, reporting obligations, and audit controls governing TODP support requests.

Section 4 – Support SLA & Service Commitment Framework

4.1 Purpose

Define service level commitments, response targets, resolution expectations, and performance standards governing TODP support services.

4.2 Objectives

- Establish measurable service expectations.
- Improve customer confidence.
- Support operational accountability.
- Enable performance measurement.
- Drive service consistency.

4.3 Scope

Applies to:

- Customer support services
- Technical support services
- Incident support
- Service request management
- Escalation management

4.4 SLA Principles

- Measurable Commitments
- Transparent Performance
- Customer Accountability
- Continuous Monitoring
- Operational Excellence

4.5 SLA Components

Response Time

Resolution Time

Escalation Time

Communication Frequency

Service Availability Support

4.6 Priority Definitions

Priority 1

Critical business impact.

Priority 2

Major service degradation.

Priority 3

Moderate operational impact.

Priority 4

Minor operational impact.

Priority 5

Informational request.

4.7 Response Targets

Priority 1

Immediate acknowledgement.

Priority 2

Rapid acknowledgement.

Priority 3

Business-hour acknowledgement.

Priority 4

Standard queue processing.

Priority 5

Routine processing.

Specific numerical targets shall be maintained within operational SLA schedules approved by the Platform Operations Committee.

4.8 Resolution Targets

Resolution objectives shall be established according to:

- Business impact
- Customer tier
- Risk classification
- Service criticality

4.9 Escalation Targets

Escalation timelines shall be defined for:

- Operational incidents
- Security incidents
- Compliance incidents
- Executive-impacting events

4.10 Customer Communication Commitments

Support teams shall provide:

- Status updates
- Resolution updates
- Escalation notifications
- Closure notifications

4.11 SLA Measurement Framework

Measure:

- Response compliance
- Resolution compliance
- Escalation compliance
- Communication compliance

4.12 Service Review Requirements

Weekly

- SLA performance review

Monthly

- Customer service review

Quarterly

- Executive service review

4.13 SLA Exception Management

Exceptions require:

- Documentation
- Business justification
- Management approval
- Corrective action planning

4.14 Metrics

- SLA Compliance Rate
- Response Time Compliance
- Resolution Time Compliance
- Escalation Compliance
- Customer Satisfaction

4.15 Audit Requirements

Maintain:

- SLA Reports
- Performance Records
- Exception Records
- Review Minutes

4.16 Ownership

Primary Owner:

Head of Support Operations

Review Authority:

Platform Operations Committee

Approval Authority:

Product Governance Board

4.17 Traceability

RTM References:

- SLA-001
- SLA-002
- SUP-SLA-001
- AUD-SLA-001

4.18 Section Summary

This section establishes support service commitments, response and resolution standards, performance measurement requirements, exception management controls, and audit obligations governing TODP support delivery.

SUPPORT MODEL V1

Section 5 – Escalation Management Framework

5.1 Purpose

Establish a formal escalation framework governing operational, technical, security, compliance, and executive escalations across TODP support operations.

5.2 Objectives

- Accelerate issue resolution.
- Ensure proper stakeholder involvement.
- Minimize customer impact.
- Maintain accountability.
- Support governance oversight.

5.3 Scope

Applies to:

- Support tickets
- Service disruptions
- Security incidents
- Compliance concerns

- Customer escalations
- Executive escalations

5.4 Escalation Principles

- Timely Escalation
- Clear Accountability
- Risk-Based Prioritization
- Evidence Preservation
- Transparent Communication

5.5 Escalation Model

Level 1

Customer Support Team

Level 2

Technical Support Team

Level 3

Engineering Teams

Level 4

Executive & Governance Escalation

5.6 Escalation Categories

Category A

Operational Escalation

Category B

Technical Escalation

Category C

Security Escalation

Category D

Compliance Escalation

Category E

Executive Escalation

5.7 Escalation Triggers

- SLA breach risk
- Repeated customer complaints
- Production service outage
- Security concern
- Regulatory concern
- Data integrity issue
- High-risk governance issue

5.8 Escalation Workflow

Issue Identification

→ Impact Assessment

→ Escalation Decision

→ Assignment

→ Investigation

→ Resolution

→ Closure

5.9 Operational Escalations

Examples:

- Service degradation
- Infrastructure instability
- Monitoring failures
- Capacity issues

5.10 Security Escalations

Examples:

- Unauthorized access attempts
- Authentication failures
- Security policy violations
- Threat detection alerts

Security escalations shall involve Security Operations immediately.

5.11 Compliance Escalations

Examples:

- Audit findings
- Regulatory concerns
- Data governance violations
- Control failures

5.12 Executive Escalation Criteria

Mandatory executive escalation for:

- SEV-1 incidents
- Major customer impact
- Regulatory exposure
- Significant reputational risk
- Strategic customer concerns

5.13 Customer Escalation Procedures

Customer escalation shall include:

- Escalation identifier
- Assigned owner
- Status updates

- Resolution timeline

5.14 Communication Requirements

Escalated issues require:

- Stakeholder notification
- Progress updates
- Resolution updates
- Closure communication

5.15 Escalation Documentation

Maintain:

- Escalation ID
- Ticket linkage
- Escalation rationale
- Resolution evidence
- Closure approval

5.16 Metrics

- Escalation Volume
- Escalation Resolution Time
- Escalation Accuracy
- Escalation Reopen Rate

5.17 Audit Requirements

Maintain:

- Escalation Logs
- Communication Records
- Resolution Records
- Approval Records

5.18 Ownership

Primary Owner:

Technical Support Manager

Review Authority:

Support Management Office

5.19 Traceability

RTM References:

- ESC-SUP-001
- ESC-SUP-002
- INC-001
- AUD-ESC-001

5.20 Section Summary

This section defines escalation categories, escalation workflows, stakeholder involvement requirements, communication obligations, documentation standards, and governance controls supporting TODP support operations.

SUPPORT MODEL V1

Section 6 – Incident Support & Major Incident Coordination

6.1 Purpose

Define support team responsibilities and coordination procedures during operational incidents, security incidents, and major service disruptions affecting TODP.

6.2 Objectives

- Restore service rapidly.
- Coordinate cross-functional response.
- Maintain customer communication.
- Preserve operational evidence.
- Support incident governance requirements.

6.3 Scope

Applies to:

- Production incidents
- Security incidents
- Infrastructure failures
- Service degradation events
- Customer-impacting outages
- Major operational events

6.4 Incident Support Principles

- Rapid Response
- Clear Ownership
- Coordinated Execution
- Continuous Communication
- Evidence Preservation

6.5 Incident Support Lifecycle

Incident Detection

- Support Engagement
- Investigation
- Escalation
- Resolution
- Validation
- Closure
- Postmortem

6.6 Incident Severity Alignment

SEV-1

Critical Service Failure

SEV-2

Major Service Degradation

SEV-3

Moderate Service Impact

SEV-4

Minor Service Impact

SEV-5

Informational Event

Severity classifications shall align with OPS RUNBOOK V1.

6.7 Support Team Responsibilities

Customer Support

- Customer communications
- Ticket management
- Status updates

Technical Support

- Investigation
- Troubleshooting
- Resolution support

Engineering Teams

- Defect remediation
- Platform recovery
- Technical validation

Security Teams

- Security investigation
- Threat containment
- Security validation

6.8 Major Incident Team Structure

Incident Commander

Operations Lead

Technical Lead

Security Lead

Communications Lead

Governance Representative

6.9 Customer Communication During Incidents

Customers shall receive:

- Incident acknowledgement
- Status updates
- Resolution notification
- Post-incident summary when applicable

6.10 Major Incident Workflow

Incident Declared

→ Team Mobilization

→ Impact Assessment

→ Investigation

→ Containment

→ Recovery

→ Validation

→ Closure

6.11 Support Escalation During Incidents

Escalation shall occur when:

- Resolution exceeds targets
- Risk increases
- Additional expertise required
- Customer impact expands

6.12 Resolution Validation

Validate:

- Service availability
- Functional integrity
- Customer confirmation when applicable
- Monitoring stability

6.13 Post-Incident Activities

Required activities:

- Root cause analysis
- Corrective action planning
- Knowledge base updates
- Governance review

6.14 Reporting Requirements

Daily

- Active incident report

Weekly

- Incident trend review

Monthly

- Incident performance review

6.15 Metrics

- Incident Resolution Time
- MTTR
- Escalation Rate
- Customer Impact Duration
- Incident Recurrence Rate

6.16 Audit Requirements

Maintain:

- Incident Records
- Communications Logs
- Resolution Evidence
- Postmortem Reports

6.17 Ownership

Primary Owner:

Incident Commander

Review Authority:

Platform Operations Committee

6.18 Traceability

RTM References:

- INC-SUP-001
- INC-SUP-002
- OPS-INC-001
- AUD-INC-001

6.19 Section Summary

This section defines support responsibilities during incidents, major incident coordination procedures, customer communication requirements, escalation standards, validation controls, and audit obligations supporting TODP operational resilience.

SUPPORT MODEL V1

Section 7 – Customer Communication & Stakeholder Engagement

7.1 Purpose

Establish standards governing customer communication, stakeholder engagement, service updates, support notifications, and customer-facing operational transparency across TODP.

7.2 Objectives

- Maintain customer confidence.
- Ensure timely communication.
- Improve support transparency.
- Reduce communication-related escalations.
- Support enterprise customer expectations.

7.3 Scope

Applies to:

- Support requests
- Service incidents
- Escalations
- Planned maintenance
- Security notifications
- Governance-related communications

7.4 Communication Principles

- Accuracy
- Timeliness

- Transparency
- Professionalism
- Consistency
- Accountability

7.5 Stakeholder Categories

Internal Stakeholders

- Product Leadership
- Platform Operations
- Engineering Teams
- Security Teams
- Governance Teams

External Stakeholders

- Enterprise Customers
- Customer Administrators
- Partners
- Auditors
- Regulators (when required)

7.6 Communication Types

Type A

Ticket Updates

Type B

Incident Communications

Type C

Maintenance Notifications

Type D

Escalation Notifications

Type E

Service Review Communications

Type F

Security Communications

7.7 Customer Communication Lifecycle

Issue Reported

→ Acknowledgement

→ Investigation Update

→ Resolution Update

→ Validation

→ Closure Notification

7.8 Communication Requirements

Every customer communication shall include:

- Ticket Reference
- Status Summary
- Current Actions
- Expected Next Steps
- Support Contact Information

7.9 Incident Communication Requirements

Provide:

- Initial acknowledgement
- Ongoing status updates
- Resolution confirmation
- Post-incident summary when applicable

7.10 Planned Maintenance Notifications

Notifications shall include:

- Maintenance identifier
- Scheduled window
- Expected impact
- Service availability expectations
- Support contact details

7.11 Executive Communication Requirements

Executive notification required for:

- Major customer impact
- SEV-1 incidents
- Regulatory concerns
- Strategic customer escalations
- Security incidents with business impact

7.12 Communication Channels

- Support Portal
- Email
- Service Status Portal
- Incident Management Platform
- Executive Briefings

7.13 Communication Quality Standards

Communications shall be:

- Factually accurate
- Non-speculative
- Traceable
- Approved where required

7.14 Customer Feedback Collection

Collect feedback through:

- Satisfaction surveys
- Closure surveys
- Service reviews
- Customer success reviews

7.15 Metrics

- Customer Satisfaction Score (CSAT)
- Communication Timeliness
- Notification Compliance
- Customer Escalation Rate

7.16 Audit Requirements

Maintain:

- Communication Logs
- Notification Records
- Customer Feedback Records
- Escalation Communications

7.17 Ownership

Primary Owner:

Customer Support Manager

Review Authority:

Support Management Office

7.18 Traceability

RTM References:

- COM-SUP-001
- COM-SUP-002
- CSAT-001
- AUD-COM-001

7.19 Section Summary

This section defines customer communication standards, stakeholder engagement procedures, notification requirements, communication quality controls, and audit obligations supporting TODP support services.

SUPPORT MODEL V1

Section 8 – Knowledge Management & Self-Service Support

8.1 Purpose

Establish governance, maintenance procedures, and operational standards for support knowledge assets, self-service resources, troubleshooting guides, and support documentation.

8.2 Objectives

- Improve support efficiency.
- Increase first-contact resolution rates.
- Reduce repetitive support requests.
- Preserve organizational knowledge.
- Enable scalable customer support.

8.3 Scope

Applies to:

- Knowledge articles
- Troubleshooting guides
- Support playbooks
- FAQ repositories
- Operational procedures
- Customer self-service content

8.4 Knowledge Management Principles

- Documentation First
- Reuse Before Recreation
- Continuous Improvement

- Version Control
- Controlled Publication

8.5 Knowledge Asset Categories

Category A

Customer Knowledge Articles

Category B

Technical Support Articles

Category C

Troubleshooting Guides

Category D

Operational Procedures

Category E

Security Support Procedures

Category F

Governance Support Documentation

8.6 Knowledge Lifecycle

Creation

→ Review

- Approval
- Publication
- Maintenance
- Retirement

8.7 Knowledge Article Requirements

Every article shall include:

- Article ID
- Title
- Purpose
- Scope
- Procedure
- Validation Steps
- Version Information

8.8 Self-Service Support Capabilities

Provide:

- Searchable knowledge base
- FAQ repository
- Troubleshooting guides
- Service status information
- Support request submission

8.9 Content Review Requirements

Monthly

- High-usage article review

Quarterly

- Full knowledge review

After Major Incidents

- Knowledge update validation

8.10 Knowledge Ownership

Customer Articles

Owner:

Customer Support Team

Technical Articles

Owner:

Technical Support Team

Platform Articles

Owner:

Engineering Teams

Governance Articles

Owner:

Governance Team

8.11 Publication Controls

Publication requires:

- Accuracy review
- Technical review
- Approval workflow
- Version tracking

8.12 Knowledge Quality Requirements

Content shall be:

- Accurate
- Current
- Traceable
- Actionable
- Understandable

8.13 Training Integration

Knowledge assets shall support:

- New hire onboarding
- Support certification
- Incident response training
- Customer education

8.14 Metrics

- Knowledge Base Usage
- Self-Service Resolution Rate
- Article Accuracy Rate
- Knowledge Coverage

8.15 Audit Requirements

Maintain:

- Article Versions
- Approval Records
- Review Records
- Publication Logs

8.16 Ownership

Primary Owner:

Support Knowledge Manager

Review Authority:

Support Management Office

8.17 Traceability

RTM References:

- KB-001
- KB-002
- DOC-001
- AUD-KB-001

8.18 Section Summary

This section defines knowledge management governance, self-service support capabilities, content lifecycle controls, publication standards, review requirements, and audit obligations supporting scalable TODP support operations.

SUPPORT MODEL V1

Section 9 – Support Performance Management & Service Quality Assurance

9.1 Purpose

Establish performance measurement, service quality governance, quality assurance procedures, and continuous service improvement controls for TODP support operations.

9.2 Objectives

- Measure support effectiveness.
- Improve service quality.
- Ensure SLA compliance.
- Increase customer satisfaction.
- Support operational excellence.

9.3 Scope

Applies to:

- Customer support operations
- Technical support operations
- Incident support
- Escalation management
- Service request handling
- Customer communications

9.4 Performance Management Principles

- Data-Driven Decisions
- Continuous Measurement
- Service Accountability
- Quality Validation

- Customer-Centric Improvement

9.5 Performance Measurement Framework

Operational Metrics

→ Service Metrics

→ Customer Metrics

→ Governance Metrics

→ Executive Reporting

9.6 Key Performance Indicator Categories

Category A

Operational Efficiency

Category B

Service Quality

Category C

Customer Experience

Category D

SLA Performance

Category E

Governance Compliance

9.7 Operational Metrics

- Ticket Volume
- Backlog Size
- Resolution Time
- Escalation Rate
- Reopen Rate
- First Contact Resolution Rate

9.8 Service Quality Metrics

- Resolution Accuracy
- Quality Review Score
- Documentation Completeness
- Knowledge Utilization Rate

9.9 Customer Experience Metrics

- Customer Satisfaction Score (CSAT)
- Customer Escalation Rate
- Customer Retention Indicators
- Support Experience Rating

9.10 SLA Performance Metrics

- Response Compliance Rate
- Resolution Compliance Rate

- Escalation Compliance Rate
- Communication Compliance Rate

9.11 Quality Assurance Reviews

Daily

- Critical ticket review

Weekly

- Quality sampling review

Monthly

- Service quality assessment

Quarterly

- Support effectiveness review

9.12 Quality Review Criteria

Assess:

- Ticket classification accuracy
- Resolution quality

- Communication quality
- Documentation completeness
- SLA compliance

9.13 Continuous Improvement Activities

- Trend analysis
- Root cause reviews
- Process optimization
- Training improvements
- Knowledge updates

9.14 Reporting Requirements

Weekly

- Support Operations Report

Monthly

- Service Quality Report

Quarterly

- Executive Service Review

9.15 Audit Requirements

Maintain:

- KPI Reports
- Quality Review Records
- Improvement Plans
- Service Assessments

9.16 Ownership

Primary Owner:

Support Quality Manager

Review Authority:

Support Management Office

Approval Authority:

Platform Operations Committee

9.17 Traceability

RTM References:

- KPI-SUP-001
- KPI-SUP-002
- QA-001
- AUD-QA-001

9.18 Section Summary

This section defines support performance management standards, quality assurance controls, reporting requirements, improvement activities, and audit obligations supporting enterprise-grade TODP support services.

SUPPORT MODEL V1

Section 10 – Support Compliance, Audit Readiness & Continuous Improvement

10.1 Purpose

Establish compliance governance, audit readiness procedures, evidence management requirements, and continuous improvement controls supporting TODP support operations.

10.2 Objectives

- Maintain continuous audit readiness.
- Demonstrate support compliance.
- Preserve operational evidence.
- Reduce support-related risk.
- Improve support maturity over time.

10.3 Scope

Applies to:

- Customer support operations
- Technical support operations
- Ticket management
- Escalation management
- Incident support
- Knowledge management
- Service quality management

10.4 Compliance Principles

- Continuous Readiness
- Evidence-Based Compliance
- Full Traceability
- Accountability
- Repeatable Processes

10.5 Compliance Framework Alignment

Support operations shall align with:

- PRD V1
- BRD V1
- SRS V1
- SAD V1
- TDD V1
- RTM V1

- OPS RUNBOOK V1
- SECURITY ARCHITECTURE V1
- DATA GOVERNANCE V1
- COMPLIANCE PACKAGE V1

10.6 Audit Readiness Components

- Support Procedures
- Ticket Records
- Escalation Records
- SLA Reports
- Training Records
- Quality Reviews
- Customer Communications

10.7 Evidence Management Requirements

Support evidence shall include:

- Ticket histories
- Resolution records
- Escalation documentation
- Approval records
- Customer communications
- Service reviews

10.8 Compliance Review Cadence

Monthly

- Operational compliance review

Quarterly

- Audit readiness assessment

Annually

- Comprehensive support compliance review

10.9 Control Validation Requirements

Validate:

- Process adherence
- Documentation completeness
- SLA compliance
- Escalation compliance
- Evidence availability

10.10 Support Maturity Model

Level 1

Reactive

Level 2

Managed

Level 3

Defined

Level 4

Measured

Level 5

Optimized

10.11 Continuous Improvement Lifecycle

Observation

→ Assessment

→ Prioritization

→ Remediation

→ Validation

→ Closure

10.12 Improvement Sources

- Audit findings
- Quality reviews
- Customer feedback

- Incident reviews
- Escalation reviews
- KPI trends

10.13 Governance Requirements

The Platform Operations Committee shall review:

- Audit findings
- Compliance risks
- Service quality trends
- Improvement initiatives

10.14 Metrics

- Audit Readiness Score
- Compliance Rate
- Control Effectiveness Score
- Improvement Completion Rate

10.15 Audit Requirements

Maintain:

- Audit Packages
- Compliance Reports
- Evidence Inventories

- Improvement Registers

10.16 Ownership

Primary Owner:

Compliance & Governance Team

Review Authority:

Platform Operations Committee

Approval Authority:

Product Governance Board

10.17 Traceability

RTM References:

- COMP-SUP-001
- COMP-SUP-002
- AUD-001
- AUD-SUP-001

10.18 Section Summary

This section establishes support compliance governance, audit readiness controls, evidence management standards, maturity assessment requirements, and continuous improvement mechanisms supporting enterprise-grade TODP support operations.

END OF SUPPORT MODEL V1
