

TODP V1 Product Requirements Document (PRD)

Sections 7–15

Status: FROZEN

=====

7. User Personas

Principle

TODP does not hardcode user categories.

User categories must be derived from authoritative sources.

Examples may include:

- Student
- Teacher
- Professor
- Researcher
- Engineer
- Doctor
- Architect
- Lawyer
- Entrepreneur
- Homemaker

The platform must store:

- Authority Source
- Definition
- Citation
- Retrieval Timestamp
- Jurisdiction
- Version

User categories are metadata only.

User categories are not ranking factors.

Persona Goals

Users may want to:

- Discover Opportunities
- Discover Events
- Discover Scholarships
- Discover Government Programs
- Discover Courses
- Create Similar Opportunities
- Create New Opportunities

=====

8. User Journeys

Journey 1 — Discover Opportunity

User Query

↓

Discovery Scope Expansion

↓

Evidence Retrieval

↓

Ranking

↓

Evidence Review

↓

Audit Review

↓

Registration

Discovery hierarchy:

User Context

Institution

Local

District

State

National

International

Every stage generates:

- Logs
- Trace Records
- Audit Records
- Recommendation IDs

Journey 2 — Discover Events

User Query

Online Events Discovery

Physical Events Discovery

Evidence Retrieval

Ranking

Evidence Review

Audit Review

Registration

Every stage generates:

- Logs
- Trace Records
- Audit Records
- Recommendation IDs

Journey 3 — Create Something Similar

Select Existing Opportunity

View Evidence

View Resources

View Tools

↓

View Platforms

↓

Ranking

↓

Audit

↓

Create Similar Opportunity

All resources, tools, platforms and recommendations must remain traceable and auditable.

Journey 4 — Create Something New

Describe Problem

↓

AI Clarification Questions

↓

Evidence Retrieval

↓

Examples Retrieval

↓

Institution Retrieval

↓

Program Retrieval

↓

Tool Retrieval

Ranking

Audit

Human Creates New Artifact

Human Creates Novelty.

AI Provides Evidence.

=====

9. Opportunity Discovery Requirements

Purpose

Discover opportunities from observable systems.

Supported Categories:

- Events
- Workshops
- Scholarships
- Government Programs
- Courses

Discovery Hierarchy

User Context

Institution

Local

District

State

National

International

Discovery occurs before ranking.

Discovery Pipeline

Discovery

Evidence Retrieval

Source Retrieval

Citation Retrieval

Timestamp Retrieval

Money Cost Calculation

↓

Time Cost Calculation

↓

Distance Cost Calculation

Ranking

↓

Audit

↓

Display

Required Metadata

Every opportunity must contain:

- Opportunity ID
- Source ID
- Citation ID
- Evidence Chain ID
- Retrieval Timestamp
- Organization
- Location
- Money Cost
- Time Cost
- Distance Cost
- Ranking Score
- Audit Status
- Version

=====

10. Event Discovery Requirements

Event Types

- Online Events
 - Physical Events
 - Hybrid Events
-

Event Metadata

- Event ID
 - Event Name
 - Organizer
 - Date
 - Location
 - Cost
 - Registration URL
 - Source ID
 - Citation ID
 - Retrieval Timestamp
 - Ranking Score
-

Ranking

Total Cost Score =

Money Cost

+ Time Cost

+ Distance Cost

Online events participate in the same ranking framework.

For online events:

Distance Cost = 0

Travel Time = 0

=====

11. Scholarship Discovery Requirements

Scholarship Metadata

- Scholarship ID
- Scholarship Name
- Provider
- Eligibility
- Deadline
- Amount
- URL
- Source ID
- Citation ID
- Retrieval Timestamp
- Ranking Score

Discovery Hierarchy

Institution

↓

Local

↓

District

↓

State

↓

National

↓

International

Ranking

Total Cost Score =

Money Cost

+ Time Cost

+ Distance Cost

=====

12. Government Program Discovery Requirements

Program Metadata

- Program ID
- Program Name
- Government Body
- Eligibility
- Benefits
- Deadline
- URL
- Source ID
- Citation ID
- Retrieval Timestamp
- Ranking Score

Discovery Hierarchy

Local Government

↓

District

↓

State Government

↓

National Government

International Public Bodies

Ranking

Total Cost Score =

Money Cost

+ Time Cost

+ Distance Cost

=====

13. Online Course Discovery Requirements

Course Metadata

- Course ID
- Course Name
- Provider
- Duration
- Cost
- Certification
- URL
- Source ID
- Citation ID
- Retrieval Timestamp
- Ranking Score

Popularity Metrics

Display if available:

- Views
- Enrollments
- Downloads
- Ratings
- Reviews

Popularity is informational.

Popularity does not override ranking.

Ranking

Total Cost Score =

Money Cost

+ Time Cost

+ Distance Cost

=====

14. Create Something Similar

Purpose

Allow users to understand how existing opportunities were created.

Inputs

Existing:

- Event
 - Workshop
 - Scholarship
 - Program
 - Course
-

Outputs

System may provide:

- Tools Used
- Resources Used
- Platforms Used
- Steps
- Requirements

Before recommendation, retrieve:

- Evidence
 - Source
 - Citation
 - Retrieval Timestamp
 - Trace Metadata
 - Audit Metadata
 - Recommendation ID
-

Ranking

All recommendations must be ranked.

Total Cost Score =

Money Cost

+ Time Cost

+ Distance Cost

Auditability

Every recommendation must remain:

- Traceable
 - Auditable
 - Reproducible
- =====

15. Create Something New

Purpose

Allow users to create new opportunities based on observed problems.

Principle

Human Creates Novelty.

AI Provides Evidence.

AI Responsibilities

AI may:

- Ask Clarification Questions
- Retrieve Examples
- Retrieve Systems
- Retrieve Institutions
- Retrieve Programs
- Retrieve Tools
- Retrieve Evidence

AI may not:

- Invent Facts
 - Invent Authorities
 - Invent Citations
 - Invent Metrics
-

Provider Evidence Rule

Before recommending:

- Tool
- Institution
- Program
- Platform
- Service

the system must attempt to retrieve evidence from:

- Official Website
- Official Documentation
- Official Program Page
- Official Statistics
- Official Reports

before third-party sources.

Creation Outputs

May include:

- Event Plans
 - Workshop Plans
 - Program Plans
 - Community Initiatives
 - Learning Groups
-

Recommendation Pipeline

Evidence

Money Cost Calculation

Time Cost Calculation

Distance Cost Calculation

Ranking

Audit

Display

Universal Metadata Requirement

Every recommendation must contain:

- Recommendation ID
- Source ID
- Citation ID
- Evidence Chain ID
- Retrieval Timestamp
- Calculation Method
- Audit Status
- Version
- Money Cost
- Time Cost
- Distance Cost
- Ranking Score
