

DOMAIN MODEL

Section 1 – Domain Modeling Framework

1.1 Purpose

Establish the enterprise domain modeling framework governing business domains, bounded contexts, domain ownership, relationships, and conceptual structures across TODP.

1.2 Objectives

- Create a common business language.
- Define clear domain boundaries.
- Support architectural consistency.
- Improve traceability.
- Enable scalable platform evolution.

1.3 Scope

Applies to:

- Business domains
- Operational domains
- Governance domains
- AI governance domains
- Audit domains
- Data governance domains

1.4 TODP Core Business Flow

Opportunity

→ Authority

→ Evidence

→ Retrieval

→ Ranking

→ Recommendation

→ Governance Review

→ Audit

→ Replay

1.5 Domain Modeling Principles

- Single Responsibility
- Clear Ownership
- Explicit Relationships
- Traceable Dependencies
- Governance Alignment

1.6 Core Domains

Domain A

Opportunity Domain

Domain B

Authority Domain

Domain C

Evidence Domain

Domain D

Retrieval Domain

Domain E

Ranking Domain

Domain F

Recommendation Domain

Domain G

Governance Domain

Domain H

Audit Domain

Domain I

Replay Domain

1.7 Cross-Cutting Domains

Identity & Access Management

Compliance Management

Risk Management

Observability

Operations Management

1.8 Governance Requirements

All domains shall maintain:

- Domain owner
- Domain glossary
- Domain entities
- Domain relationships
- Domain boundaries

1.9 Ownership

Primary Owner:

Chief Product Officer

Review Authority:

Architecture Review Board

Approval Authority:

Product Governance Board

1.10 Traceability

RTM References:

- DOM-001
- DOM-002
- SAD-001

1.11 Section Summary

This section establishes the domain modeling framework, governance principles, domain ownership structure, and conceptual foundations governing TODP.

DOMAIN MODEL

Section 2 – Opportunity Domain Model

2.1 Purpose

Define the conceptual model governing opportunity management and opportunity lifecycle processing.

2.2 Domain Name

Opportunity Domain

2.3 Domain Description

The Opportunity Domain serves as the entry point for TODP decision workflows and manages opportunity evaluation requests.

2.4 Domain Owner

Product Management

2.5 Core Responsibilities

- Opportunity registration
- Opportunity classification
- Opportunity lifecycle management
- Opportunity tracking

2.6 Primary Entity

Opportunity

2.7 Supporting Entities

Customer

Product_Capability

Governance_Decision

2.8 Domain Relationships

Opportunity

→ Authority

Opportunity

→ Recommendation

Opportunity

→ Governance Review

2.9 Business Rules

- Every opportunity requires a unique identifier.
- Every opportunity shall maintain lifecycle status.
- Every opportunity shall support governance traceability.
- Every opportunity shall support auditability.

2.10 Upstream Dependencies

Customer Domain

Identity Domain

2.11 Downstream Dependencies

Authority Domain

Evidence Domain

2.12 Traceability

RTM References:

- OPP-001
- OPP-002

2.13 Section Summary

This section defines the Opportunity Domain, core responsibilities, entities, dependencies, and governance rules supporting TODP workflow initiation.

DOMAIN MODEL

Section 3 – Authority Domain Model

3.1 Purpose

Define the conceptual model governing authority validation and authority source management.

3.2 Domain Name

Authority Domain

3.3 Domain Description

The Authority Domain validates legitimacy and credibility of information sources used within TODP decision workflows.

3.4 Domain Owner

Governance Team

3.5 Core Responsibilities

- Authority validation
- Authority lifecycle management
- Authority confidence assessment
- Authority governance

3.6 Primary Entity

Authority

3.7 Supporting Entities

Policy

Control

Compliance_Assessment

3.8 Domain Relationships

Authority

→ Evidence

Authority

→ Governance Review

Authority

→ Audit

3.9 Business Rules

- Every authority source must be validated.
- Authority status must be maintained.
- Expired authorities cannot support recommendations.
- Governance reviews must be traceable.

3.10 Upstream Dependencies

Opportunity Domain

3.11 Downstream Dependencies

Evidence Domain

Governance Domain

3.12 Traceability

RTM References:

- AUTH-001
- AUTH-002

3.13 Section Summary

This section defines the Authority Domain, governance responsibilities, entity relationships, and validation rules supporting trusted decision-making.

DOMAIN MODEL

Section 4 – Evidence Domain Model

4.1 Purpose

Define the conceptual model governing evidence collection, evidence validation, evidence management, and evidence lifecycle oversight.

4.2 Domain Name

Evidence Domain

4.3 Domain Description

The Evidence Domain manages information assets supporting recommendations, governance decisions, audits, and replay activities.

4.4 Domain Owner

Governance Team

4.5 Core Responsibilities

- Evidence registration
- Evidence validation
- Evidence lifecycle management
- Evidence governance

4.6 Primary Entity

Evidence

4.7 Supporting Entities

Authority

Audit_Record

Compliance_Assessment

4.8 Domain Relationships

Evidence

→ Retrieval

Evidence

→ Recommendation

Evidence

→ Audit

Evidence

→ Replay

4.9 Business Rules

- Evidence must reference validated authority.
- Evidence integrity shall be preserved.
- Evidence lifecycle status shall be maintained.
- Evidence must support auditability.

4.10 Upstream Dependencies

Authority Domain

4.11 Downstream Dependencies

Retrieval Domain

Recommendation Domain

Audit Domain

4.12 Traceability

RTM References:

- EVID-001
- EVID-002

4.13 Section Summary

This section defines the Evidence Domain, entity structures, governance rules, lifecycle controls, and dependencies supporting TODP transparency and traceability.

DOMAIN MODEL

Section 5 – Retrieval Domain Model

5.1 Purpose

Define the conceptual model governing evidence retrieval, retrieval execution, source discovery, retrieval traceability, and retrieval governance.

5.2 Domain Name

Retrieval Domain

5.3 Domain Description

The Retrieval Domain is responsible for locating, collecting, validating, and presenting evidence required to support TODP recommendation workflows.

5.4 Domain Owner

AI Governance Team

5.5 Core Responsibilities

- Evidence retrieval
- Retrieval validation
- Source tracking
- Retrieval traceability
- Retrieval governance

5.6 Primary Entity

Retrieval

5.7 Supporting Entities

Evidence

Authority

System_Event

5.8 Domain Relationships

Retrieval

→ Ranking

Retrieval

→ Governance Review

Retrieval

→ Audit

5.9 Business Rules

- Retrieval activities must be traceable.
- Evidence sources must be recorded.
- Retrieval outcomes must be auditable.
- Retrieval events must support replay.

5.10 Upstream Dependencies

Evidence Domain

Authority Domain

5.11 Downstream Dependencies

Ranking Domain

Governance Domain

Audit Domain

5.12 Domain Events

Retrieval Initiated

Retrieval Completed

Retrieval Failed

Retrieval Reviewed

5.13 Traceability

RTM References:

- RETR-001
- RETR-002

5.14 Section Summary

This section defines the Retrieval Domain, its entities, responsibilities, relationships, governance requirements, and lifecycle events supporting evidence discovery.

DOMAIN MODEL

Section 6 – Ranking Domain Model

6.1 Purpose

Define the conceptual model governing ranking execution, prioritization logic, ranking governance, and ranking transparency.

6.2 Domain Name

Ranking Domain

6.3 Domain Description

The Ranking Domain prioritizes retrieved evidence and produces ordered outputs supporting recommendation generation.

6.4 Domain Owner

AI Governance Team

6.5 Core Responsibilities

- Ranking execution
- Ranking scoring
- Ranking prioritization
- Ranking governance
- Ranking validation

6.6 Primary Entity

Ranking

6.7 Supporting Entities

Retrieval

Evidence

Governance_Review

6.8 Domain Relationships

Ranking

→ Recommendation

Ranking

→ Audit

Ranking

→ Replay

6.9 Business Rules

- Ranking outputs must be explainable.
- Ranking calculations must be traceable.
- Ranking results must support governance review.
- Ranking outcomes must be reproducible.

6.10 Upstream Dependencies

Retrieval Domain

Evidence Domain

6.11 Downstream Dependencies

Recommendation Domain

Audit Domain

Replay Domain

6.12 Domain Events

Ranking Initiated

Ranking Completed

Ranking Reviewed

Ranking Escalated

6.13 Traceability

- RANK-002

6.14 Section Summary

This section defines the Ranking Domain, prioritization responsibilities, entity relationships, governance rules, and operational events supporting recommendation quality.

DOMAIN MODEL

Section 7 – Recommendation Domain Model

7.1 Purpose

Define the conceptual model governing recommendation generation, recommendation lifecycle management, recommendation governance, and recommendation accountability.

7.2 Domain Name

Recommendation Domain

7.3 Domain Description

The Recommendation Domain produces decision-support outcomes based on validated evidence, retrieval activities, and ranking results.

7.4 Domain Owner

AI Governance Team

7.5 Core Responsibilities

- Recommendation generation
- Recommendation validation
- Recommendation lifecycle management
- Recommendation governance

7.6 Primary Entity

Recommendation

7.7 Supporting Entities

Ranking

Evidence

Governance_Review

7.8 Domain Relationships

Recommendation

→ Governance Review

Recommendation

→ Audit

Recommendation

→ Replay

7.9 Business Rules

- Recommendations must be evidence-backed.
- Recommendations must be explainable.
- Recommendations must support governance review.
- Recommendations must be auditable.

7.10 Upstream Dependencies

- REC-001
- REC-002

7.14 Section Summary

This section defines the Recommendation Domain, its governance responsibilities, lifecycle controls, entity relationships, and accountability requirements supporting TODP decision outcomes.

DOMAIN MODEL

Section 8 – Governance Domain Model

8.1 Purpose

Define the conceptual model governing oversight activities, governance reviews, approvals, escalations, and governance decision management.

8.2 Domain Name

Governance Domain

8.3 Domain Description

The Governance Domain provides oversight and accountability mechanisms ensuring recommendations and operational activities comply with TODP governance principles.

8.4 Domain Owner

Governance Team

8.5 Core Responsibilities

- Governance reviews
- Decision approvals
- Escalation management
- Governance reporting
- Governance accountability

8.6 Primary Entities

Governance_Review

Governance_Decision

Governance_Exception

8.7 Supporting Entities

Recommendation

Risk

Compliance_Assessment

8.8 Domain Relationships

Governance Review

→ Audit

Governance Decision

→ Audit

Governance Decision

→ Replay

8.9 Business Rules

- Governance decisions require accountability.
- Governance reviews must be documented.
- Governance exceptions require approval.
- Escalations must be traceable.

8.10 Upstream Dependencies

Recommendation Domain

Risk Domain

Compliance Domain

8.11 Downstream Dependencies

- GOV-002

8.14 Section Summary

This section defines the Governance Domain, oversight mechanisms, decision structures, governance entities, relationships, and accountability requirements supporting TODP governance operations.

DOMAIN MODEL

Section 9 – Audit Domain Model

9.1 Purpose

Define the conceptual model governing auditability, audit trail management, compliance verification, investigation support, and evidentiary accountability.

9.2 Domain Name

Audit Domain

9.3 Domain Description

The Audit Domain preserves immutable records of activities occurring across TODP and enables investigation, compliance validation, governance assurance, and regulatory review.

9.4 Domain Owner

Audit & Compliance Team

9.5 Core Responsibilities

- Audit trail management

- Activity recording
- Compliance verification
- Investigation support
- Evidence preservation

9.6 Primary Entity

Audit_Record

9.7 Supporting Entities

Governance_Review

Recommendation

System_Event

9.8 Domain Relationships

Audit Record

→ Replay

Audit Record

→ Compliance Assessment

Audit Record

→ Governance Decision

9.9 Business Rules

- All auditable actions must be recorded.
- Audit records must be immutable.
- Audit records must support investigations.
- Audit retention requirements must be enforced.

9.14 Section Summary

This section defines the Audit Domain, its entities, responsibilities, governance requirements, and relationships supporting enterprise auditability.

DOMAIN MODEL

Section 10 – Replay Domain Model

10.1 Purpose

Define the conceptual model governing recommendation reconstruction, historical analysis, decision replay, and traceability validation.

10.2 Domain Name

Replay Domain

10.3 Domain Description

The Replay Domain enables reconstruction of historical decisions and validation of recommendation outcomes using preserved evidence and audit trails.

10.4 Domain Owner

Audit Governance Team

10.5 Core Responsibilities

- Decision replay
- Historical reconstruction
- Traceability validation
- Governance assurance
- Investigation support

10.6 Primary Entity

Replay_Session

10.14 Section Summary

This section defines the Replay Domain, its reconstruction responsibilities, governance requirements, entity relationships, and operational events supporting TODP replayability.

DOMAIN MODEL

Section 11 – Identity & Access Management Domain Model

11.1 Purpose

Define the conceptual model governing authentication, authorization, role management, user accountability, and access governance.

11.2 Domain Name

Identity & Access Management Domain

11.3 Domain Description

The Identity & Access Management Domain controls access to TODP resources while ensuring accountability and compliance with security requirements.

11.4 Domain Owner

Security Team

11.5 Core Responsibilities

- User lifecycle management
- Authentication
- Authorization
- Role administration
- Access reviews

11.6 Primary Entities

11.14 Section Summary

This section defines the Identity & Access Management Domain, security entities, governance controls, and access accountability requirements supporting TODP security architecture.

DOMAIN MODEL

Section 12 – Risk Management Domain Model

12.1 Purpose

Define the conceptual model governing enterprise risk identification, assessment, treatment, monitoring, and reporting.

12.2 Domain Name

Risk Management Domain

12.3 Domain Description

The Risk Management Domain manages enterprise risks impacting strategic objectives, operations, technology, compliance, governance, and business continuity.

12.4 Domain Owner

Enterprise Risk Management Team

12.5 Core Responsibilities

- Risk identification
- Risk assessment
- Risk treatment
- Risk monitoring
- Risk reporting

18.8 Domain Integrity Rules

- Domains shall maintain bounded responsibilities.
- Ownership shall remain explicit.
- Cross-domain dependencies shall be documented.
- Domain changes shall follow governance review.

18.9 Traceability

RTM References:

- DOMREL-001
- DOMREL-002

- SAD-002

18.10 Section Summary

This section defines enterprise-wide domain relationships, governance dependencies, business interactions, and architectural boundaries supporting TODP domain integrity.

DOMAIN MODEL

Section 19 – Bounded Context Framework

19.1 Purpose

Define bounded contexts, ownership boundaries, and responsibility segregation across TODP domains.

19.2 Objectives

- Prevent domain overlap.
- Improve ownership clarity.
- Reduce architectural coupling.
- Enable scalable growth.
- Strengthen governance control.

19.3 Bounded Contexts

Context A

Opportunity Management Context

Owned By:

Product Management

Primary Entity:

Opportunity

Context B

Authority Management Context

Owned By:

Governance Team

Primary Entity:

Authority

Context C

Evidence Management Context

Owned By:

Governance Team

- Ranking
- Recommendation

Context E

Governance Oversight Context

Owned By:

Governance Team

Primary Entities:

- Governance Review
- Governance Decision
- Governance Exception

Context F

Audit & Replay Context

Owned By:

Audit Governance Team

Primary Entities:

- Audit_Record
- Replay_Session

Context G

Enterprise Management Context

Owned By:

Business Operations

Primary Entities:

- KPI
- Risk
- Compliance Assessment

19.4 Governance Requirements

- Context ownership shall be documented.
- Context boundaries shall remain stable.
- Context interactions shall be traceable.
- Cross-context changes require review.

19.5 Traceability

RTM References:

- BC-001
- BC-002
- ARCH-001

19.6 Section Summary

This section defines TODP bounded contexts, ownership assignments, governance requirements, and responsibility boundaries supporting maintainable enterprise architecture.

DOMAIN MODEL

Section 20 – Domain Governance, Evolution & Lifecycle Management

20.1 Purpose

Establish governance requirements governing domain evolution, ownership management, lifecycle oversight, and continuous improvement of the TODP domain model.

20.2 Objectives

- Preserve domain integrity.
- Support controlled evolution.
- Maintain architectural consistency.
- Enable traceable change management.
- Ensure long-term scalability.

20.3 Scope

Applies to:

- All business domains
- All governance domains
- All supporting domains
- All domain relationships
- All domain entities

20.4 Domain Governance Principles

- Explicit Ownership
- Controlled Change
- Architectural Consistency
- Governance Oversight
- Continuous Improvement

20.5 Domain Lifecycle

Domain Proposal

→ Domain Review

→ Domain Approval

→ Domain Implementation

→ Domain Monitoring

→ Domain Improvement

→ Domain Retirement

20.6 Domain Change Governance

Changes require:

- Impact assessment
- Architecture review
- Governance review
- Traceability update
- Documentation update

20.7 Domain Review Requirements

Quarterly

Domain Health Assessment

Annually

Enterprise Domain Model Review

20.8 Domain Success Criteria

- Clear ownership
- Stable boundaries
- Low coupling
- High traceability
- Governance compliance

20.9 Metrics

- Domain Governance Compliance Rate
- Domain Change Success Rate
- Dependency Stability Index
- Domain Documentation Completeness

20.10 Audit Requirements

Maintain:

- Domain Inventories
- Relationship Maps
- Review Reports
- Change Assessments
- Governance Decisions

20.11 Ownership

Primary Owner:

Chief Product Officer

Review Authority:

Architecture Review Board

Approval Authority:

Product Governance Board

20.12 Traceability

RTM References:

- DOMGOV-001
- DOMGOV-002
